Pakistan Field Office	2020	Enhancements of version cLMIS 2.2	4.0

List of Acronyms

AJK	Azad Jammu and Kashmir
CW&S	Central Warehouse and Supplies
CYP	Couple Years of Protection
DDP	District Distribution Points
DOH	Department of Health
DPIU	District Project Implementation Unit
DPWO	District Population Welfare Office
FATA	Federally Administered Tribal Areas
FLCF	Fist Level Care Facility
FWC	Family Welfare Center
LHW	Lady Health Worker
LMIS	Logistics Management Information System
MoNHSR&C	Ministry of National Health Services, Regulations and Coordination
MSU	Mobile Service Unit
PLDO	Provincial Line Department Outlets
PPIU	Provincial Project Implementation Unit
PWD	Population Welfare Department
RHS-A	Reproductive Health Services – A
RHS-B	Reproductive Health Services – B
RMP	Registered Medical Practitioners
SDP	Service Delivery Point
TB	Tuberculosis
TBA	Traditional Birth Attendants
USAID	United States Agency for International Development
WMS	Warehouse Management System

Assumptions

This user guide assumes that you already have Contraceptive Logistics Management Information System accounts as per your geographical level and role. This user guide also assumes that you are familiar with basic web-application account login procedures.

System Requirements

The Contraceptive Logistics Management Information System is accessible from any Desktop PC, Mac, or Linux computer with Internet access and a supported Web-browser.

Browser Support

The following browsers and later versions fully support cLMIS standard view:

- Mozilla Firefox (Windows, Mac, Linux)
- Google Chrome (Windows, Mac, Linux)
- Netscape (Windows, Mac, Linux)
- Safari (Mac)
- Internet Explorer 9 and above (Windows)

1

Overview

Of Contraceptive Logistics Management Information System (cLMIS)

This *User Manual* provides step-by-step instructions for getting started with the Contraceptive Logistics Management Information System (cLMIS). It provides guidelines on application features to manage logistics data for contraceptive products. This user manual is organized according to the logical flow of cLMIS features and describes tasks in the same order users can perform while using this web portal.

Before You Begin...

It is recommended to have a working internet connection for web-access to the cLMIS web portal in order to use it side-by-side when reading this manual.

Background

USAID Pakistan was tasked by the Government of Pakistan with implementing a Logistics Management Information System (LMIS) for contraceptive commodities using a web-based approach to facilitate country-wide data entry without the installation of any specific software. After several months of thorough consultations with all stakeholders from the public and private sectors, the Project adapted and enhanced the web-based application from the international best practices. The LMIS was contextualized to the local stakeholder structure and the devolution of responsibility from the national to the provincial and district level.

The LMIS for contraceptive commodities was launched by the Prime Minister of Pakistan on July 2011 as the public sector's first Logistics Management Information System, later termed as Contraceptive Logistics Management Information System (cLMIS).

LMIS has the flexibility to integrate other health commodities along-with contraceptives. In addition to the public sector, this application is also able to record contraceptives national sales data of the private sector. The system is able to cater the district level reporting of logistics data, by aggregating facility level data through paper-based reports for LHW program, DOH facilities of Pakistan as well as PWD of Balochistan and Regions. The system also provides health facility level reporting for Population Welfare Department (PWD) in three provinces i.e. Punjab, Khyber

Pakhtunkhwa and Sindh. However in a few districts of LHW program and DOH stakeholders, a pilot for facilities-based reporting at the district level is currently going on.

To strengthen reporting and visibility of private sector contraceptives, a district level interface has been incorporated in the cLMIS which will enable provincial and regional health and population departments to see the contribution of the private sector in their respective geographical areas at both the provincial and regional levels.

In order to sustain the usage cLMIS nationwide, the Project trained the government users of the system through the public sector master trainers. The prescribed training provided knowledge and skills required to enter data into the web-based cLMIS.

The Central Warehouse and Supplies (CW&S) is a national repository for contraceptive commodities. All public sector stakeholders at the district level create integrated requisition requests (CLR-6) to the CW&S for contraceptive supplies. The requisition process is now part of the cLMIS which generates CLR-6 based on the reported consumption and stock availability data. The Project is providing the transportation support from CW&S to the district stores.

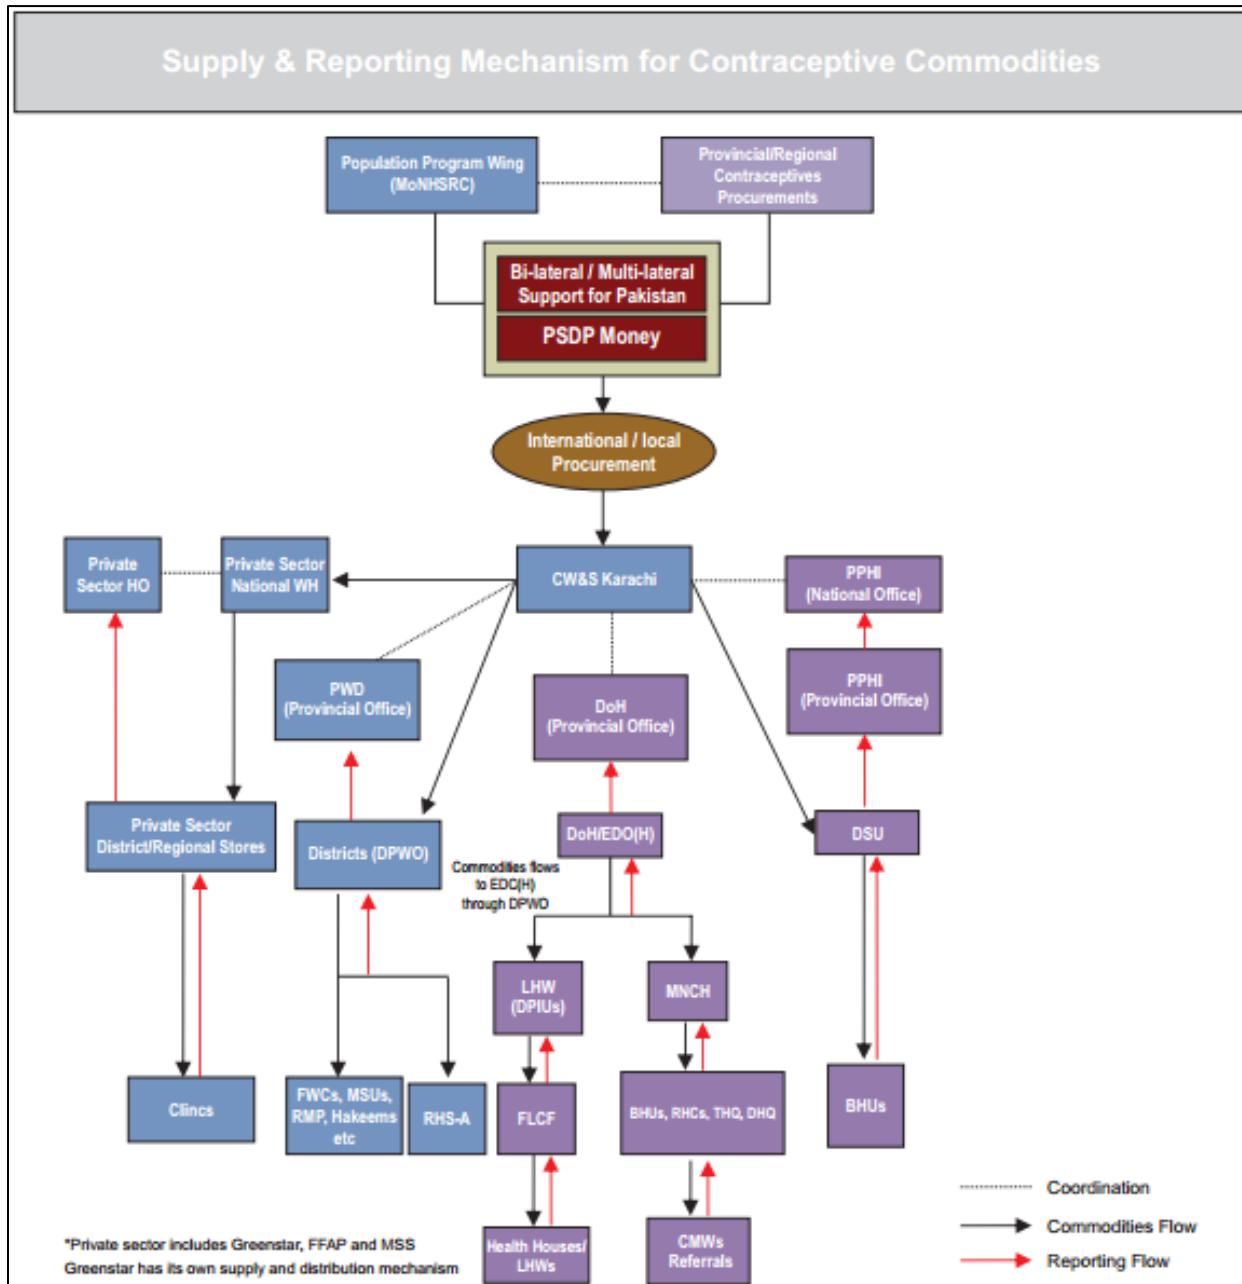

The cLMIS data visibility plays a significant role in improving stock monitoring at the district and sub-district level. Therefore, timely and accurate data entry and submission of monthly reports at the district level are critical to the functioning of the cLMIS. The data collected from the LMIS can then subsequently be used at each level of the supply chain to enhance informed decision making to meet service delivery demands.

The 2010 population policy clearly emphasizes the importance of operationally effective logistics management information system (LMIS). The paper-based logistics information system was unable to accurately track the contraceptive stock status at various levels of the supply chain from CWH to the facility level. Inaccurate reporting data resulted in unrealistic forecasting and procurement inefficiencies when working within the whole logistics system. In identifying the need for accurate essential logistics data for decision making, Ministry of National Health Services, Regulations and Coordination (MoNHSR&C) requested the Project to replace the paper-based system to ensure an effective contraceptive supply chain.

The USAID is providing technical assistance to MoNHSR&C to strengthen the logistics system and improve overall supply chain management. During the years 2008-2009, a series of consultative meetings were held between the Ministry and USAID to access the requirements of the MoNHSR&C. One of the most important areas which require immediate attention is improved data visibility to ensure improved product availability.

Logistics Management Structure in Pakistan

There are different vertical programs in public health with varying commodity distribution systems for products such as lab equipment, anti-TB drugs and other essential medicines in addition to contraceptives. The verticality of the health system poses a unique challenge in Pakistan because of the varying systems implemented in public healthcare program. Another complexity includes the fact that some systems are operating under a pull system whereas others are referred to a push system to deliver products.

Some programs distribute directly from the central warehouse to the district stores such as for contraceptive while others flow through different supply chain levels. There are linkages among various stakeholders at national, provincial and district levels for requisition, delivery and storage of contraceptives. Any LMIS intended to provide national level stock status and consumption data must accommodate all stakeholders and their linkages.

At the public sector level, there are three main stakeholders; Ministry of National Health Services, Regulations and Coordination (MoNHSR&C), Population Welfare Departments in each province and region and Departments or Directorates of Health in each province and region. Mainly, there are three primary healthcare components of DOH which includes; Static Health Facilities, Lady Heath Workers (LHW) program and Mother & Neo-natal Child Healthcare (MNCH) program.

A key stakeholder within DOH is the National Program for Family Planning and Primary Health Care which is a vertical program implanted through eight provincial project implementation unit (PPIUs) and district project implementation units (DPIU) at the district level. Although there are vertical programs in DOH at the provincial levels, these programs are functionally integrated at the district level. However, a reasonably good level of coordination exists between the Health and Population Welfare Departments.

Reporting Structure

Population Welfare Department (PWD)

The figure below illustrates the reporting structure of PWD. All Service Delivery Points (SDPs) report to their respective district/area/agency and the DPWO compiles as well as sends the CLR-15 report to provincial/regional headquarters. Each Provincial/Regional Headquarter and ICT prepares the CLR-11, which is then sent to the Federal office for preparation of the monthly contraceptive performance report. The CWH in Karachi sends the CLR-8 monthly for review at the federal level. The CLR-8 provides stock status of commodities lying in CWH.

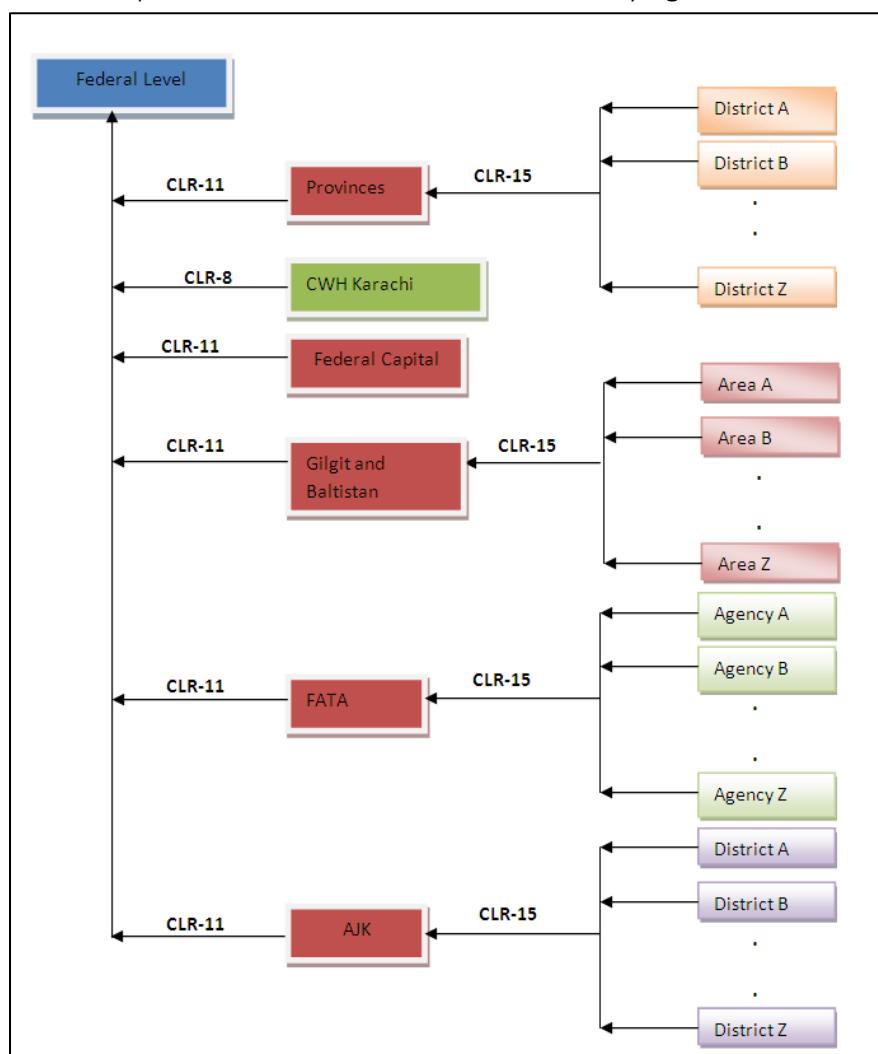

Figure-1: A Flowchart showing flow of data from district to federal level in Population Welfare Department.

The following facilities are being managed by the District Population Welfare Department which provides contraceptives and supervises activities of following service delivery points:

1. FHC (Family Health Clinic) / RHS-A (Reproductive Health Services – A)

2. FWC (Family Welfare Center)
3. RHS-B (Reproductive Health Services – B)
4. MSU (Mobile Service Unit)
5. Social Mobilizers
6. PLDs (Provincial Line Department Outlets)
7. RMPs (Registered Medical Practitioners)
8. Hakeems (Traditional healers using mostly herbal remedies)
9. Homeopaths
10. DDPs (District Distribution Points)
11. TBA (Traditional Birth Attendants)
12. Counters

Lady Health Workers (LHW) Program

The LHW program has eight (8) regions called Provincial Project Implementation Units (PPIU) and at the district level, it has District Project Implementation Units (DPIU). The DPIU is responsible for providing contraceptives to LHWs.

The eight Provincial Project Implementation Units are:

1. Peshawar (for Khyber Pakhtunkhwa)
2. FATA secretariat (based in Peshawar, providing services to FATA)
3. Lahore (for Punjab)
4. Hyderabad (for Sindh)
5. Quetta (for Baluchistan)
6. Muzaffarabad (for AJK)
7. Gilgit (for Gilgit and Baltistan)
8. Islamabad (for federal capital territory)

Department of Health (DOH)

The Department of Health currently receives all supplies from CWH. The district DOH store provides contraceptives to static health facilities and reports family planning data through District Health Information System (DHIS) on a monthly basis.

Users and User Roles

2

for the Contraceptive Logistics Management Information System

This chapter explains the overview and user roles of Logistics Management Information System. The web-based application LMIS system is contextualized to fit the local stakeholder structure and the devolution of health and population programs of provincial governments. The system brings in district-level reporting by aggregating facility-level data through paper-based reports. With a unified system for reporting and requisitioning, the LMIS system is able to integrate information from all levels and sectors. The web-based LMIS can be accessed at <http://lmis.gov.pk>.

In order to log on to the system, the user requires a username and password. Once successfully logged in, the user is directed to the relevant dashboard and is able to obtain LMIS data and reports, users are defined by the role they have in the public health supply chain. For example, Population Welfare Department users work under Provincial PWD and District Population Welfare Officer. Similarly for the Lady Health Workers' program, the users are authorized personnel from District Program Implementation Unit (DPIU) and Provincial Program Implementation Unit (PPIU).

The following table includes the activities that various users will be able to perform once they login: *Stakeholder and level specific activities users can perform in the cLMIS.*

Activity	Level		
	Central	District (PWD, LHW and DOH)	Guest
Data Entry		✓	
Requisitions	✓	✓	
Inventory Management	✓		
Reports	✓	✓	✓
Graphs	✓	✓	✓
Maps	✓	✓	✓

* The Central warehouse will be responsible for entering all central level stock status updates into the LMIS.

User Roles

The Contraceptive Logistics Management Information System Users are basically store operators that manage and record the inventory and stock transactions. Each geographical level entails different user roles associated with their warehouse/store operations.

Anonymous/Guest User

The Anonymous or Guest user can be any web user who can perform the following tasks:

Application Feature	Associated Tasks
Dashboard	View public sector and private sector dashboards.
LMIS Explorer	View Monthly Store/Facility Reports.
Reports	View geographical and periodic logistics information reports.
Maps	View geographical and periodic logistics information on maps.
Graphs	View geographical and periodic logistics information graphs.

Designated Users

The designated users can log in to the cLMIS and perform assigned functions. Each user is assigned responsibilities based on the role and geographical level. Following is the detail of tasks associated with various designated users.

DOH District User

Application Feature	Associated Tasks
Dashboard	View public sector and private sector dashboards.
Requisitions	Add new requisition requests. View requisition requests.
Data Entry	Enter consumption data in stock report for each month.

Monthly Reports	View monthly district reports. View monthly reports of other districts.
Reports	View geographical and periodic logistics information in tabular formats.
Maps	View geographical and periodic logistics information on maps.
Graphs	View geographical and periodic logistics information in graphical formats.
Others	Change account password.

LHW District User

Application Feature	Associated Tasks
Dashboard	View public sector and private sector dashboards.
Requisitions	Add new requisition requests. View requisition requests.
Data Entry	Enter consumption data in stock report for each month for segregated health facilities in the field.
Monthly Reports	View monthly district reports. View monthly reports of other districts.
Reports	View geographical and periodic logistics information in tabular formats.
Maps	View geographical and periodic logistics information on maps.
Graphs	View geographical and periodic logistics information in graphical formats.
Others	Change account password.

PWD District User

Application Feature	Associated Tasks
Dashboard	View public sector and private sector dashboards e.
Requisitions	Add new requisition requests. View requisition requests.
Data Entry	Enter consumption data in stock report for each month for segregated health facilities in the field.
Monthly Reports	View monthly district reports. View monthly reports of other districts.
Reports	View geographical and periodic logistics information in tabular formats.
PBS Reports	View Pakistan Bureau of Statistics reports in tabular formats.
Provincial Reports	View provincial PWD reports in tabular formats.
District Reports	View district level PWD reports in tabular formats.
Maps	View geographical and periodic logistics information on the map.
Graphs	View geographical and periodic logistics information in graphical formats.
Others	Change account password.

Central Warehouse User

Application Feature	Associated Tasks
Dashboard	View Distribution and SOH, Expiry Status, Product Summary and Month of Stock dashboards from here.
Inventory Management	<p>Receive stock from other warehouses.</p> <p>Receive stock from suppliers and create placement vouchers.</p> <p>Search for received stock.</p> <p>Issue stock to other warehouses.</p> <p>Create pick order forms.</p> <p>Search for issued stock.</p> <p>Manage Batches.</p> <p>Add placement locations for stock.</p> <p>Transfer stock to other locations.</p>
Stock Adjustments	<p>Add adjustments.</p> <p>Search for adjustments.</p>
Gate Pass	<p>Issue a new gate pass.</p> <p>View the list of issued gate passes.</p>
Requisitions	<p>View pending requisition requests.</p> <p>Approve or deny requisition requests.</p>
Data Entry	<p>Enter new data in stock report.</p> <p>View stock report for previous months.</p>
Monthly Reports	<p>View monthly report of the central warehouse.</p> <p>View monthly reports of districts.</p>
Reports	View geographical and periodic logistics information in tabular formats.
Maps	View geographical and periodic logistics information on the map.
Graphs	View geographical and periodic logistics information in graphical formats.
Others	Change account password.

Step-by-Step Instructions

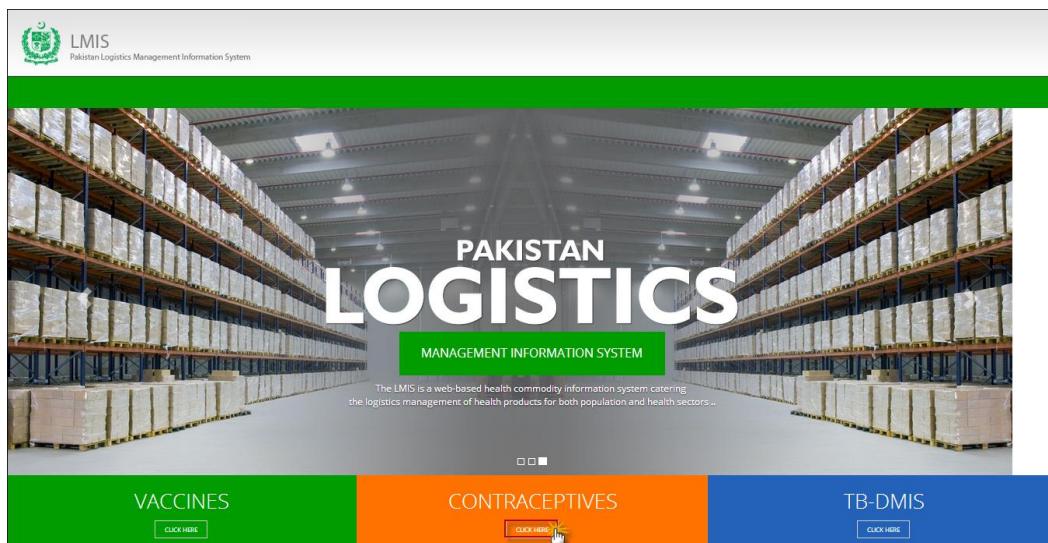

3

to use the Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on getting started with the cLMIS. In this section, you will learn about:

1. The Contraceptive Logistics Management Information System User Interface.
2. Logging Into Contraceptive Logistics Management Information System.
3. Changing your account password.
4. What to do if you forget your password.
5. Logging Out of the Contraceptive Logistics Management Information System.

The Logistics Management Information System has a single landing page for its three modules for Contraceptives, Tuberculosis, and Vaccines Management Information System. Enter the URL <http://lmis.gov.pk> to access the application homepage. Once the user enters the URL <http://lmis.gov.pk>, the application homepage will appear. The homepage displays a basic introduction to the 'Pakistan LMIS'.

Before You Begin...

It is recommended to use the cLMIS with Google Chrome or Mozilla Fire Fox. Older generations of browsers are also supported; however, their use can lead to issues with on-screen formatting and display.

Once you click **Contraceptives**, the homepage for the cLMIS will display.

Logging into cLMIS

The cLMIS is a web-based reporting and inventory management application that makes it simple for beginners and experienced users to report inventory data, view performance and graphical reports as well as maps.

Users can also access the contraceptive LMIS application directly by using <http://c.lmis.gov.pk> URL. The homepage displays a basic introduction to the 'contraceptive LMIS'.

Homepage Menu

The available menu items can be found on the top of homepage screen. The components are displayed adjacently, as shown in the image below:

Contraceptive

Contact Us

FAQs

Contact Us

The **Contact Us** tab contains addresses, telephone numbers and email addresses (where available) for key personnel as a system communication list. Therefore, the user of cLMIS will be able to see contact details of other stakeholders and can contact them as needed.

Frequently Asked Questions (FAQs)

The menu also contains a **FAQs** tab in order to provide guidance towards the most frequently asked and critical questions.

For logging in to Contraceptive LMIS application:

1. Go to <http://c.lmis.gov.pk>
2. Click the button **Click Here** on the Contraceptives tab.

The cLMIS login page will be displayed.

3. Specify the Username and Password provided to you by the Administrator.

To login as a guest or anonymous user, you can simply provide the following credentials:

Username: guest
Password: guest

You can change the password provided to you by the administrator. See “*Changing Your Password*” for details.

Never give out your password to anyone for security purposes.

4. Click **Login**. The Contraceptive Logistics Management Information System Dashboard Screen displays.

Changing Your Password

To change your cLMIS password:

1. Login to cLMIS application.

The welcome screen displays.

2. On the right-side of the application, the user login name appears.
3. Under the login name, click **Change Password** as shown in the image below:

4. Specify the following:

- **Old Password**: specify your old password.
- **New Password**: specify the new password.
- **Confirm New Password**: retype your password.

Password Requirements

Your password must be 8 characters long and have a combination of alphabets and at least one Numeric.

Never give out your password to anyone for security purposes.

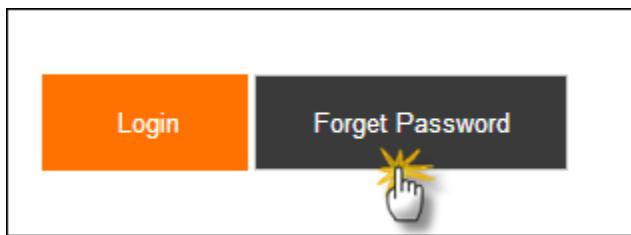

5. Click **Change Password**.

Your password will be changed successfully.

Forgot Password

In case you have forgotten your password:

1. Open the cLMIS login page by entering the URL: <http://lmis.gov.pk>.
2. In the Login section, click **Forgot Password** as shown in the image below:

An alert message will be displayed.

Please contact support@lmis.gov.pk

3. The support team will provide you with a new password via email.

Logging Out

When signed in, click **Sign Out** on the right-side of the application, as shown in the image below:

Dashboards

4

for Contraceptive Logistics Management Information System

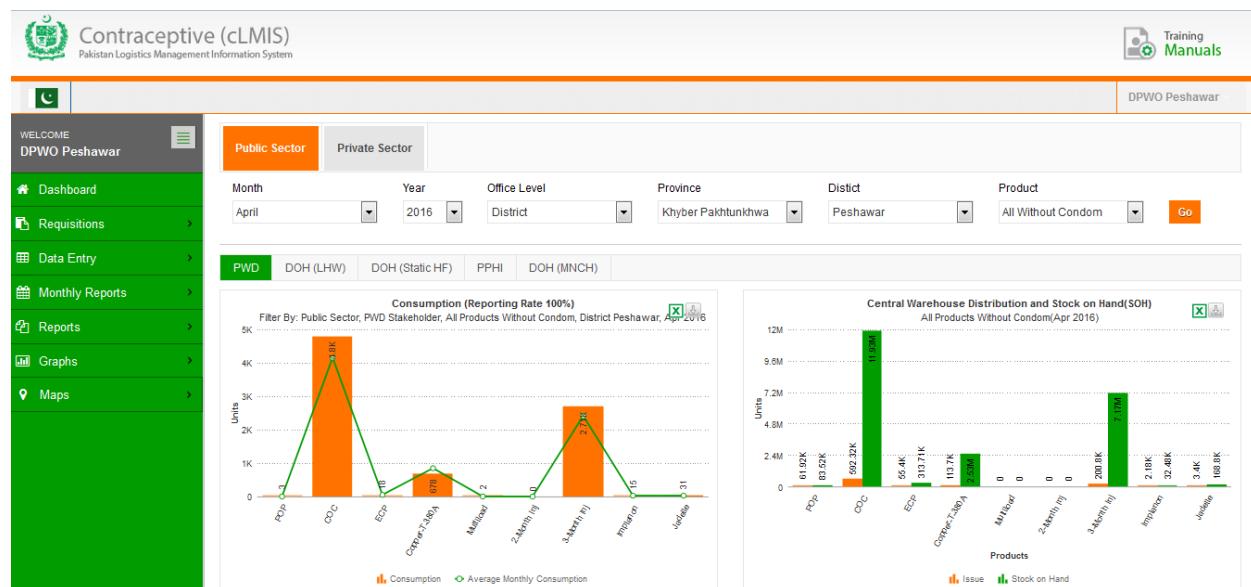

This chapter explains the step-by-step instructions for using the dashboard features on the Contraceptive Logistics Management Information system.

Introduction

The Dashboard is a visual display of the most important analysis. It can be used to achieve multiple objectives and is arranged on a single screen so the information can be viewed at a glance.

Users can view following the following dashboards headings by default:

- Public Sector Stakeholders
- Private Sector Stakeholders

Public Sector Dashboard

This dashboard allows users to quickly view analysis in a graphical manner for the selected public sector stakeholder.

- **Stock Out vs Over Stock**

This graph shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also shows the reporting rate on which this analysis is drawn.

- **Stock Issued vs Stock on Hand (SOH) in Central Warehouse**

This graph shows the comparison between the issued stock and stock on hand (SOH) for all products in the central warehouse.

- **Consumption vs Average Monthly Consumption (AMC)**

This graph compares the consumption and average monthly consumption of all contraceptive products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

- **Couple Year Protection (CYP)**

This graph shows the Couple Years of Protection (CYP) for the selected month for each contraceptive product.

Users can apply following filters.

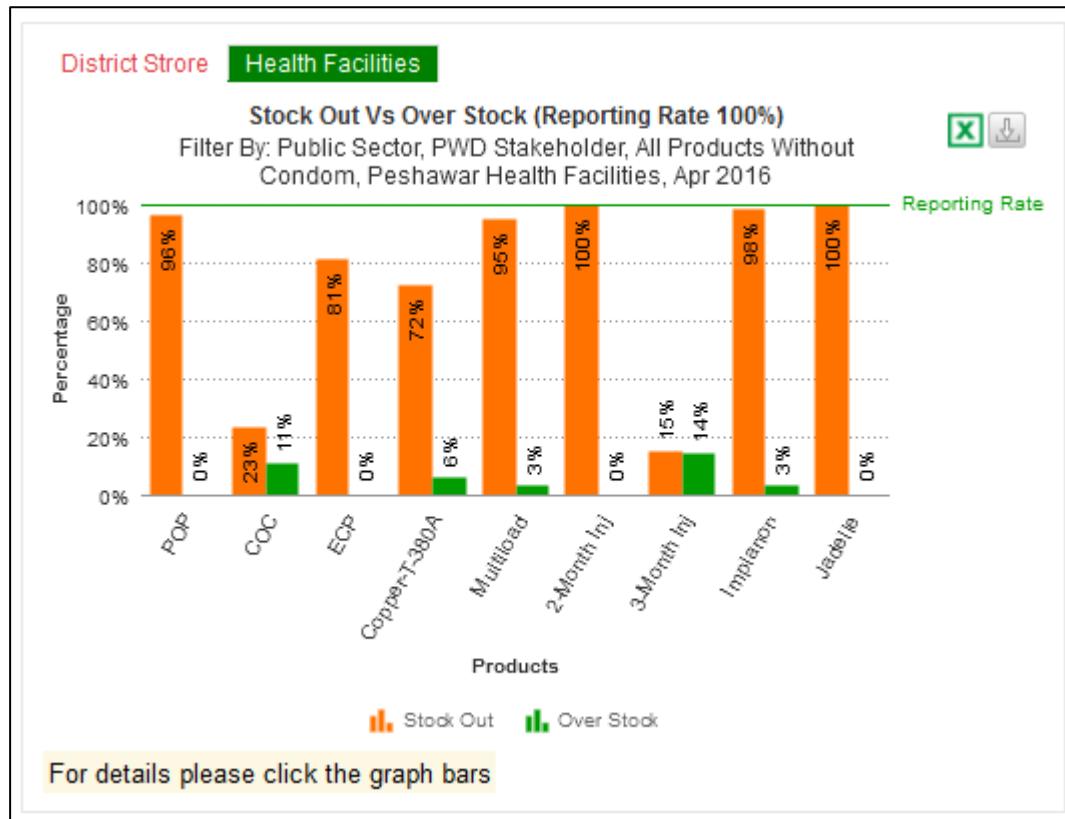

Month	Year	Office Level	Province	District	Product	
April	2016	District	Khyber Pakhtunkhwa	Peshawar	All Without Condom	Go

- **Month:** select the month from the drop-down list
- **Year:** select the year from the drop-down list.
- **Office Level:** select the Office Level from the drop-down list.
- **Province:** select the Province from the drop-down list.
- **District:** select the district for which you want to view report.
- **Product:** users can either select all products with or without condoms because the logistic analysis of condoms changes the maximum range of graphs to a level where analysis of other products is not shown properly.

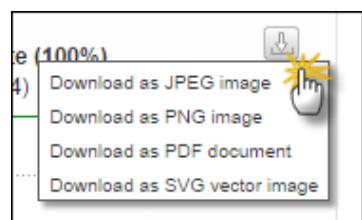

Click **Go** to view Public Sector Dashboard.

Stock Out vs Over Stock

The Public Sector dashboard shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also shows the reporting rate on which this analysis is drawn. Users can view the comparison graph for stock out and over stock of products on the horizontal axis and District percentage on the vertical axis.

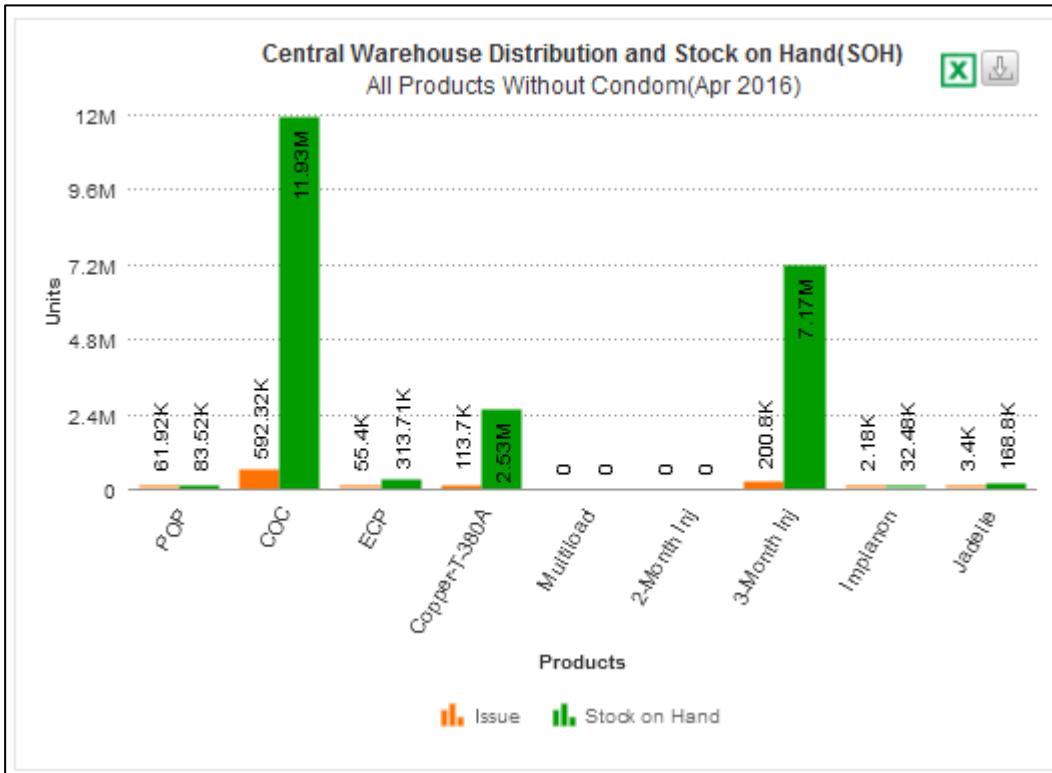

Users can also export charts in JPEG, PNG, PDF and SVG format.

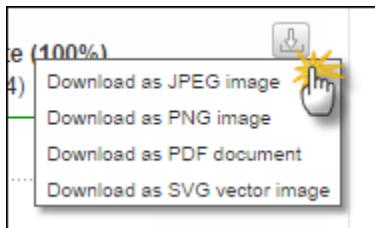

Stock Issued vs Stock on Hand (SOH) in CW&S

The Public Sector dashboard shows the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

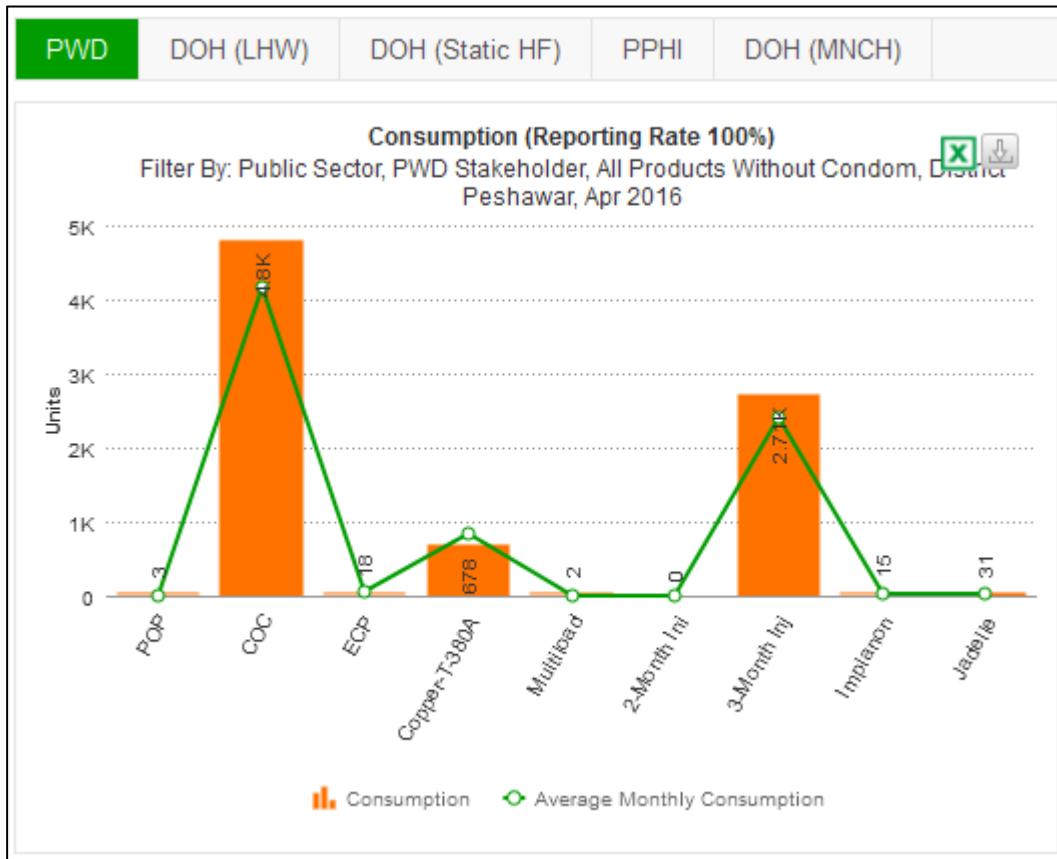

Users can also export charts in JPEG, PNG, PDF and SVG format.

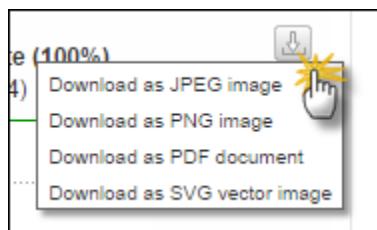

Consumption vs Average Monthly Consumption (AMC)

The Public Sector dashboard shows the comparison between consumption and average monthly consumption of all products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

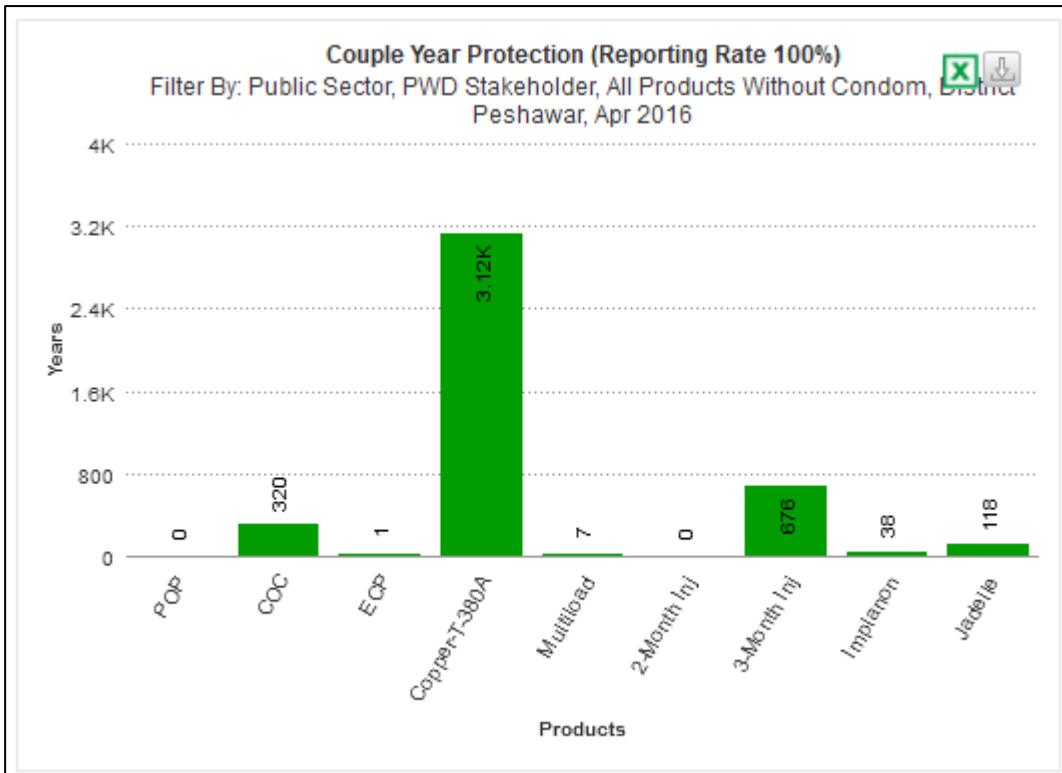

Users can also export charts in JPEG, PNG, PDF and SVG format.

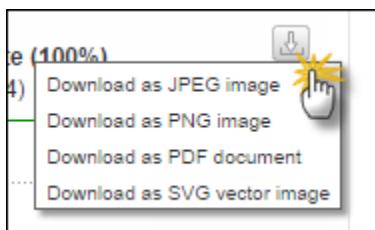

Couple Year Protection (CYP)

The Public Sector dashboard shows the CYP for the selected month for each contraceptive product.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Private Sector Dashboard

This dashboard allows users to quickly view analysis in a graphical manner for the selected private sector stakeholder.

- **Stock Out vs Over Stock**

This graph shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also shows the reporting rate on which this analysis is drawn.

- **Stock Issued vs Stock on Hand (SOH) in Central Warehouse**

This graph shows the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

- **Consumption vs Average Monthly Consumption (AMC)**

This graph shows the comparison between consumption and average monthly consumption of all products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

- **Couple Year Protection (CYP)**

This *graph* shows the CYP for the selected month for each contraceptive product.

Users can apply following filters.

Couple Year Protection Map

Filter by

Date From: 2014-01-01 Date To: 2014-12-31

Sector: Public Sector Stakeholder: PWD Province/Region: All Product: Condom

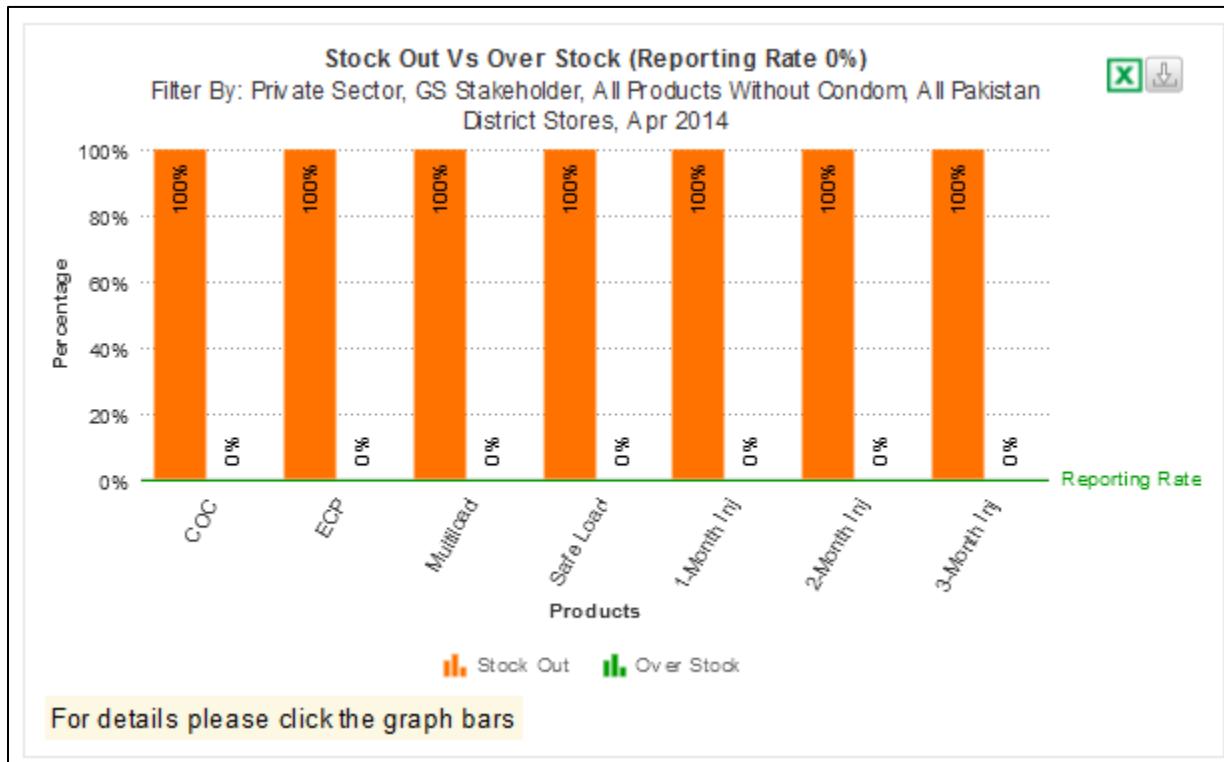

GO

- **Month:** select the month from the drop-down list
- **Year:** select the year from the drop-down list.
- **Office Level:** select the Office Level from the drop-down list.
- **Province:** select the province from the drop-down list.
- **District:** select the district for which you want to view report.
- **Product:** users can either select all products with or without condoms because the logistic analysis of condoms changes the maximum range of graphs to a level where analysis of other products is not shown properly.

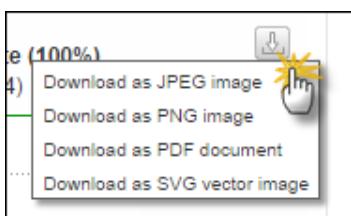

Click **Go** to view Private Sector Dashboard.

Stock Out vs Over Stock

The Private Sector dashboard shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also shows the reporting rate on which this analysis is drawn. Users can view the comparison graph for stock out and over stock of products on the horizontal axis and District percentage on the vertical axis.

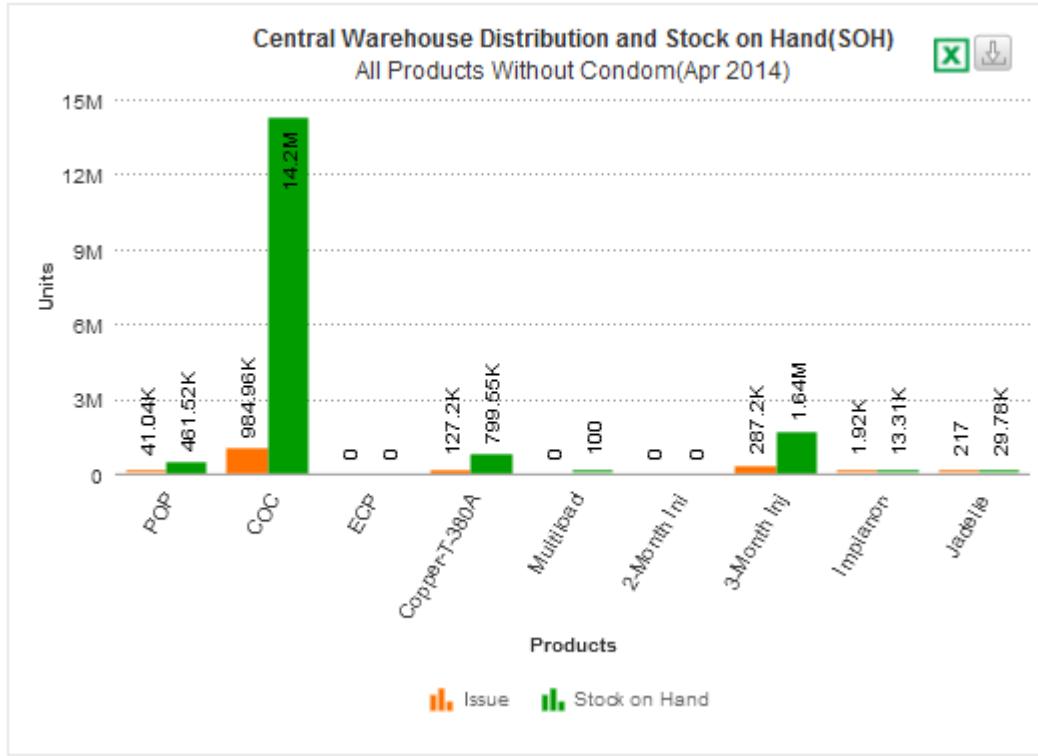

Users can also export charts in JPEG, PNG, PDF and SVG format.

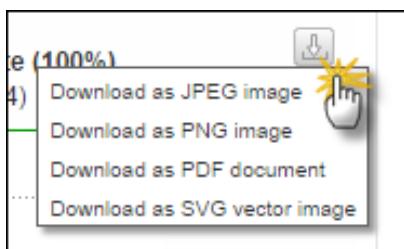

Stock Issued vs Stock on Hand (SOH) in CW&S

The Private Sector dashboard shows the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

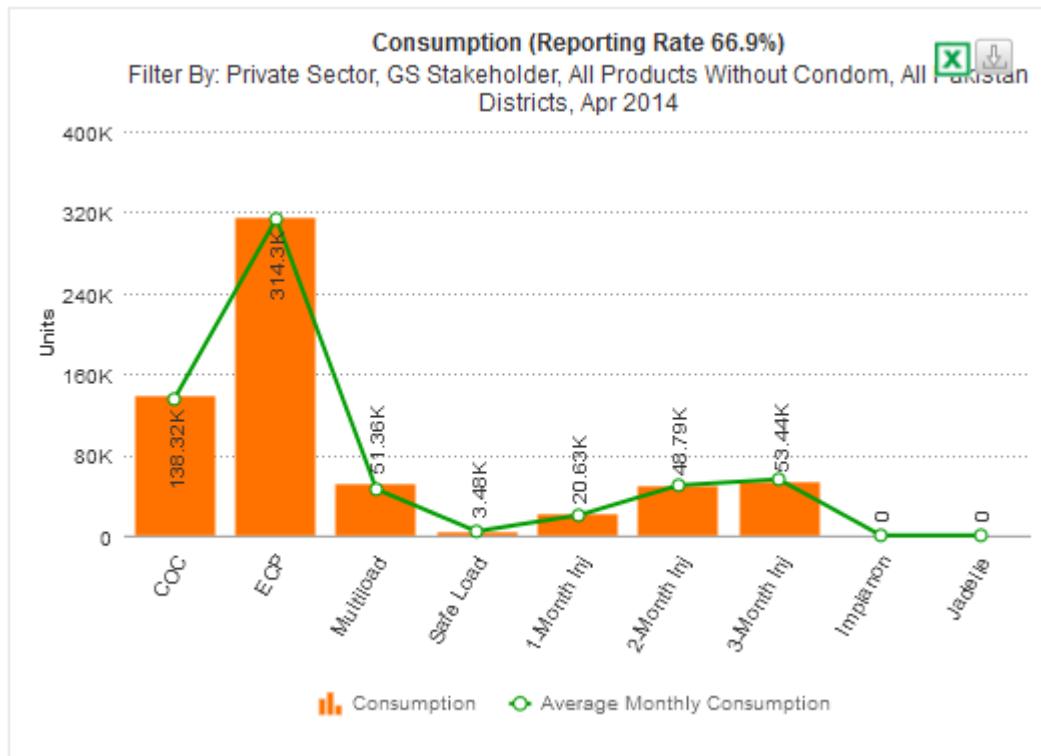

Users can also export charts in JPEG, PNG, PDF and SVG format.

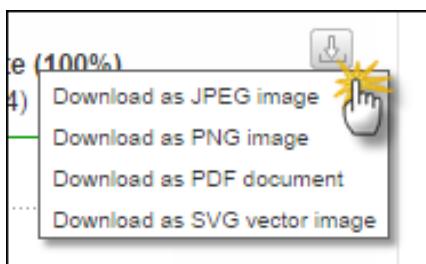

Consumption vs Average Monthly Consumption (AMC)

The Private Sector dashboard shows the comparison between consumption and average monthly consumption of all products for the selected stakeholder and the reporting rate on which this analysis is drawn.

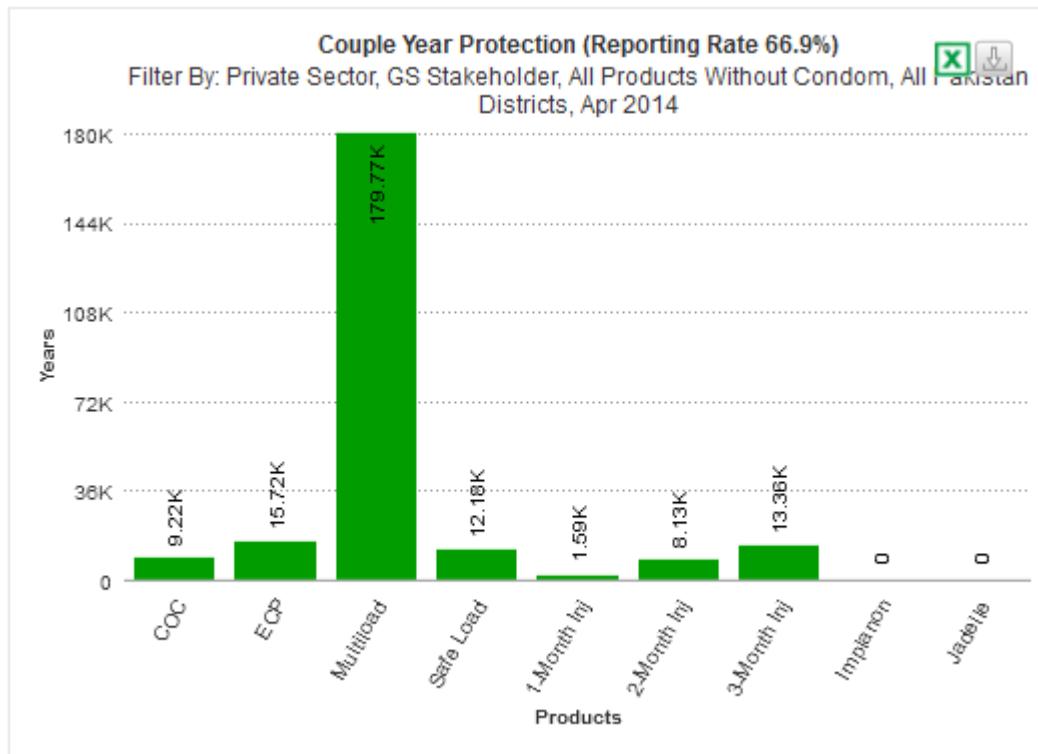

Users can also export charts in JPEG, PNG, PDF and SVG format.

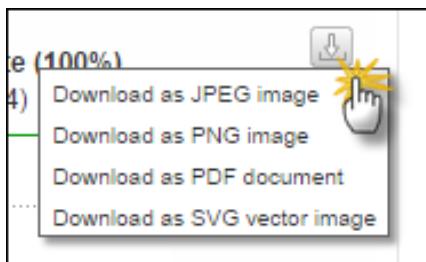

Couple Year Protection (CYP)

The Private Sector dashboard shows the product-wise CYP for the selected month.

Users can also export charts in JPEG, PNG, PDF and SVG format.

5

Reports

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on the report features that can be used by the Contraceptive Logistics Management Information system.

When a user clicks the **Reports** tab, the application shows the list of all available reports. These reports include National, Provincial and District level Reports of both public and private sectors. It also includes Stakeholder Reports, Summary Reports, Field Reports and Stock Availability Reports. The Quarterly and Provincial Reporting Rates have are also available.

Click the **Reports** tab from the main menu to show a drop down list which includes a range of reports. Users can view the list of reports from the menu and click on each report to see the data in a tabular form.

National Summary Report

National Report for April 2016

This report provides information about the consumption, average monthly consumption (AMC), quantity on hand of all products and month of stock (MOS) for each product at the National level. [Click here for details](#)

Reporting Rate	Availability Rate
50.09% Field	45.74% District Store
49.17% Field	43.62% District Store

Note: This report is based on data as on 23/05/2016 12:55 AM

The National Summary Report provides periodic consumption, average monthly consumption (AMC), stock on hand (SOH), months of stock (MOS) and couple years of protection (CYP) by each commodity for a particular month. The data is summed up for all stakeholders as well as the public and private sector in each commodity at the national level.

The National Summary Report not only provides the summary statistics but also opens up various options for users to explore the data further through various links.

The Header bar displays the Reporting Rate i.e. rate of stores reported on the left side while on the right side, the Availability Rate i.e. rate of stock available is shown. Users can click the icon to open the Reporting Rate and Stock Availability rate reports directly.

Click on the **Reporting Rate** to view the warehouse stores which have reported for a particular month.

Click on **Availability Rate** to view the stock availability rate at selected level i.e. National, Provincial or District levels.

MOS legends display the MOS Stock values. A black box represents an Unknown value.

MOS: Stock Out Under Stock Satisfactory Over Stock Un-known

Filters

You can use Month and Year filters to find values based on these time frames.

Month	Year	Sector
April	2016	Public
<input type="button" value="GO"/>		

The Report Table contains the following items:

- **Product:** Displays the list of products.
- **Consumption:** Displays the consumption data of contraceptives for the last reported month. The data for each product is the sum of all reporting levels.
- **Average Monthly Consumption (AMC):** This is calculated as average of aggregated consumption of the last three, non-zero, consumption months.
- **Stock on Hand (SOH):** the amount of product on hand. Knowing this helps monitor stock positions and anticipate stock outs in advance.
- **Months of Stock (MOS):** The estimated number of months the stock will last. This calculation is based on average monthly consumption.
- **Couple Years of Protection (CYP):** The estimated protection provided by contraceptive methods during a one-year period, based upon the volume of all contraceptives consumed during that period.

Stakeholder Summary Report

This provides information about periodic consumption and average monthly consumption of individual stakeholders for both public and private sector, for the selected product.

Non/Reported Districts

The Non-reported Districts Report provides the reporting rate for provinces as well as districts (by stakeholders) which have not reported for a particular month. If “all” is selected from the option “stakeholder”, all district level stakeholders not reporting for a particular month will appear in the list. For example, a district name will appear twice if both DPIU and DPWO have not reported.

Inventory Turnover

This report provides the inventory turnover analysis for selected geographical level.

District Stock Yearly Report

This report shows month wise stock issued or received for any stakeholder in a particular district of a province for the previous year. Users are provided with a set of filters that are helpful to extract data by province, month, year, or stakeholder. Different filters provide options to show received or issued stock.

District Stock Yearly Report

This report provides district wise information about the issued stock, received stock, consumption and quantity on hand of the selected product. [Click here](#) for details

Note: This report is based on data as on 23/05/2016 12:55 AM

The report shows the in-country available stock based on filters applied at all levels of the supply chain. Stocks are also translated in months of stock calculated from Average Monthly Consumption. Separate months of stock (MOS) for field and store are provided in addition to the aggregate for the two. In this report, only those stores appear which have reported for the period selected.

Field Availability Report

This report provides the information about the average monthly consumption (AMC), quantity on hand of all products and month of stock (MOS) for each product at health facility level

Field Stock Availability Report

This report provides the information about the average monthly consumption (AMC), quantity on hand of all products and month of stock (MOS) for each product at health facility level. [Click here](#) for details

Executive Dashboard

Background of FP Executive Dashboard

The Contraceptives Logistics Management Information System is a fully functional, Government of Pakistan owned web-based Logistics Management Information System (LMIS) (<http://lmis.gov.pk>) that manages the logistics management of FP commodities in Pakistan. It also provides business intelligence that leaders at various levels can utilize to inform policies and decisions. The USAID funded Global Health Supply Chain – Procurement & Supply Management (GHSC-PSM) project created a Family Planning Executive Dashboard as a step towards ensuring commodity security through use of cLMIS data for policy, procurement planning, financing, and stock monitoring decision making and to ensure evidence-based decisions around contraceptive stock sufficiency up to the service delivery point (SDP)/health facility level.

The GHSC-PSM project, in collaboration with the Population Program Wing / Ministry of National Health Services, Regulations & Coordination, organized a one-day session on 8th February 2018 in Lahore to launch and introduce the Family Planning (FP) Executive Dashboard to all of the Secretaries and relevant Director Generals of provincial Departments of Health and Population Welfare Departments.

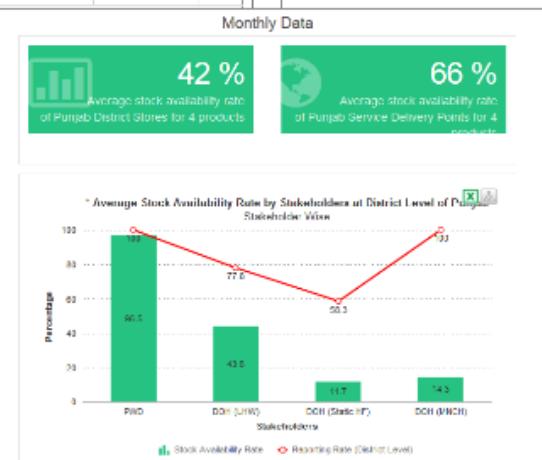

One outcome from the orientation session was the decision that the GHSC-PSM program would create a user guide for FP Executive Dashboard that will help in understanding the use of the dashboard for the relevant users today and in the future to institutionalize this knowledge.

Salient Features of the FP Executive Dashboard

The prominent features of the FP Executive Dashboard include:

- The Executive Dashboard has the capability to generate “advisories” addressed to appropriate senior level officers at the provincial and district levels where SDP stocks have gone below the agreed-upon levels posing risk of stock-out.
- The Dashboard focuses on engaging higher levels of management for their intervention at appropriate times to ensure action throughout the supply chain hierarchy. Below are recent screen shots from the FP Dashboard.

FP Executive Dashboard

This chapter introduces the features of the FP Executive Dashboard, available in the Contraceptives Logistics Management Information System (cLMIS).

In this chapter, the user will be introduced to the following:

1. [FP Executive Dashboard](#)
2. [Transactional Data Table](#)
3. [District's Stock Availability](#)
4. [SDP Level Stock Availability](#)
5. [Health Facilities Compliance Rate](#)

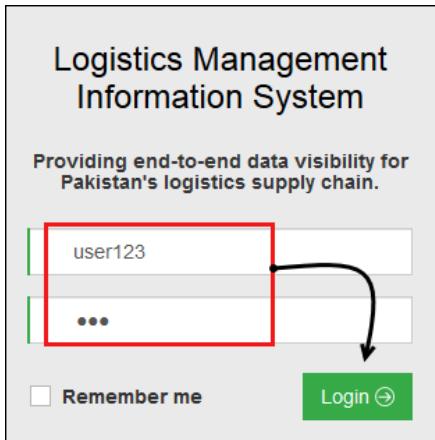

FP Executive Dashboard Overview

The FP Executive Dashboard has been developed to provide an overview of stock sufficiency of family planning commodities for all four provinces, relevant districts and Service Delivery Points (SDP) / health facilities. In each province, health and population welfare departments are the main consumer of FP commodities and in some provinces like Sindh and Khyber Pakhtunkhwa, both departments are procuring jointly with storage at the Central Warehouse & Supplies (CWS), Karachi. The dashboard also enables users to drill down to a particular commodity stock situation at the SDP level for deeper insight into commodity stock levels.

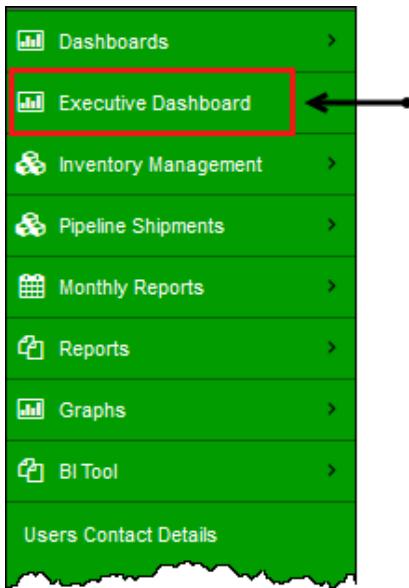

Working with the FP Executive Dashboard

To open the Executive Dashboard:

1. Go to www.lmis.gov.pk.
2. Log into the LMIS account using your provided credentials.

3. After logging in, click **Executive Dashboard** on the left side menu.

The Executive Dashboard will then display.

Upon loading, the dashboard displays on the left and is a real time stock situation at the CWS, Karachi, as on the current date, in the Transactional Data table. Please note that districts and health facilities data reporting is compiled monthly, therefore, the stock data of districts and health facilities on the right will be displayed in the

next month, e.g., data related to March will be displayed in April after data entry is completed.

The monthly data for Districts and Health Facilities on the right is populated based on filter selection.

On loading, the Transactional Data table displays real time stock situation of the central warehouse.

Products	Unit	Status	Quantity	MOS
Condom (AMC** 7,723,896.55)	PCs	Stocks at CW&S Expiring on and after: Jun-2021	165,701,085	21.45
COC (AMC** 653,312.61)	Cycles	Stocks at CW&S Expiring on and after: May-2019	11,963,632	18.31
Copper-T-380A (AMC** 47,682.19)	IUD	Stocks at CW&S Expiring on and after: Jun-2020	1,834,418	38.31
		Pipeline	11,650	0.24
		Total	1,846,068	38.55
3-Month Inj (AMC** 184,576.44)	Vials	Stocks at CW&S Expiring on and after: Mar-2020	3,822,444	20.71
Order 1,107,459 3-Month Inj Vials after 3 months to maintain the desired stock level				
Total CYP : 0				

4. In order to populate Executive Dashboard reports, select the desired filter options.

Select the required filter options and then click Go.

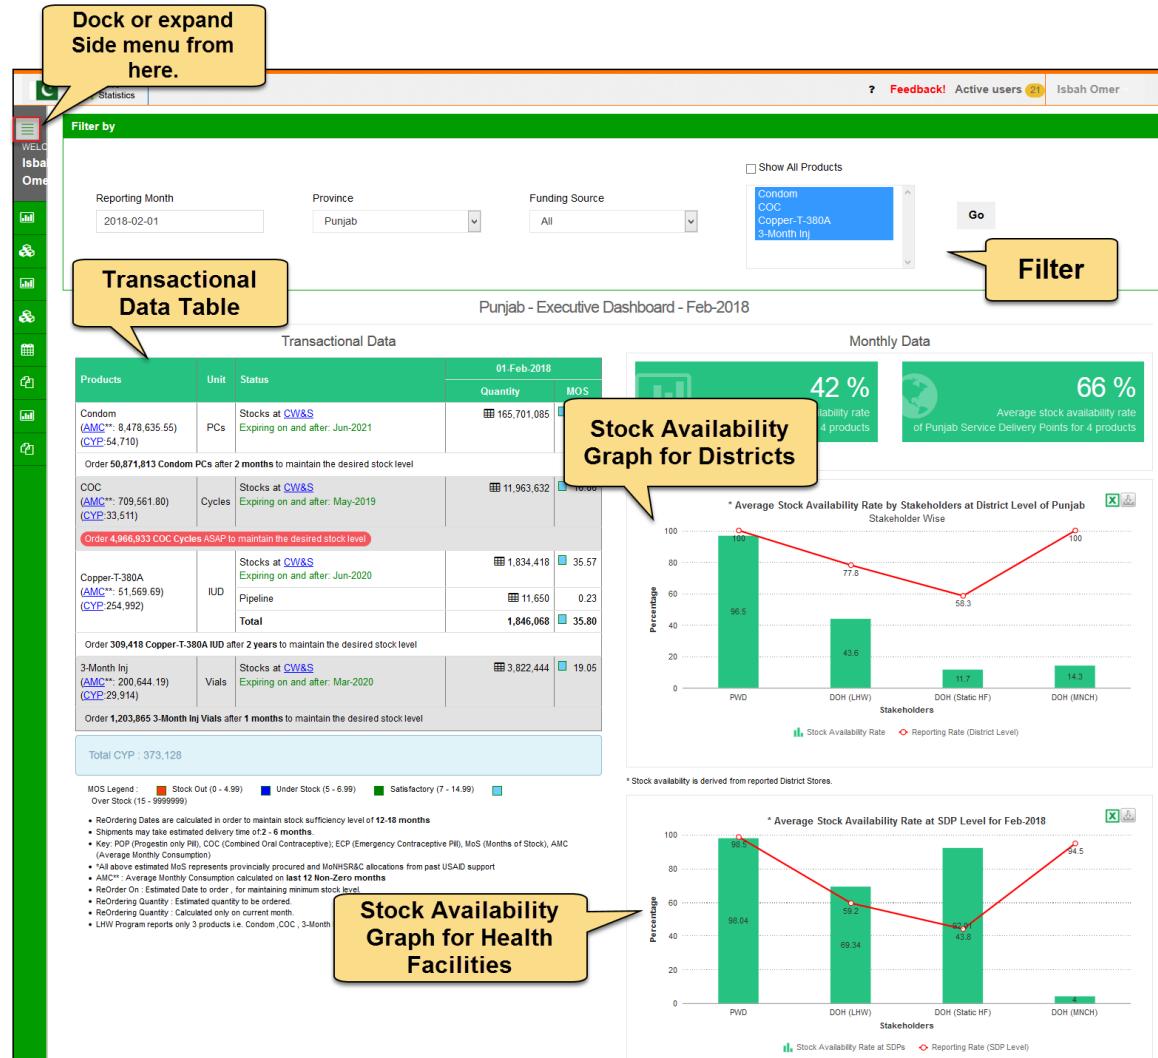

The options include:

- **Date:** select the required date from the calendar tool.
- **Province:** specify the desired province.
- **Funding Source:** specify the funding source, e.g. **Govt. of Punjab – PWD**, or **Govt. of Punjab – DoH**.

- **Products:** specify the product(s) desired. The user can select one or more products of choice.

5. Click **GO** to populate the dashboard graphs.

The Executive Dashboard populates, as shown in the image below:

The following sections explain each of the analysis reports available in the FP Executive Dashboard.

Transactional Data Table

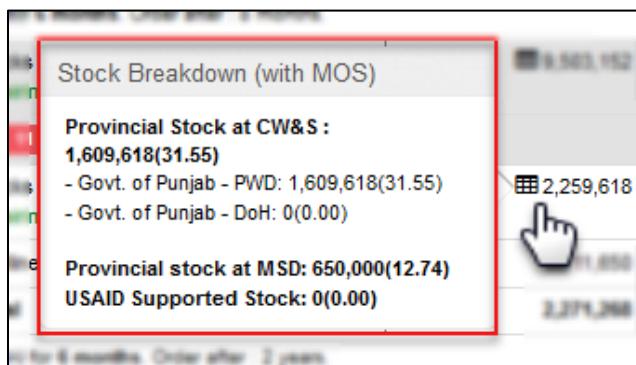

The Transactional Data table provides the status of stock availability at the CWS, Karachi and pipeline for each product for the selected province.

Transactional Data					
Products	Unit	Status	01-Feb-2018

		Total	2,271,268	44.52
Order 306,134 Copper-T-380A IUD sufficient for 6 months. Order after : 2 years.				
3-Month Inj (AMC**: 205,554.25)	Vials	Stocks at CW&S (Expiring on: 2020-Mar-31)	3,752,250	18.25
Order 1,233,325 3-Month Inj Vials sufficient for 6 months. (You need to order ASAP)				
MOS Legend : Stock Out (0 - 4.99) Under Stock (5 - 6.99) Satisfactory (7 - 14.99) Over Stock (15 - 999999)				
<ul style="list-style-type: none"> • ReOrdering Dates are calculated in order to maintain stock sufficiency level of 12-18 months • Shipments may take estimated delivery time of 2 - 6 months. • Key: POP (Progestin only Pill), COC (Combined Oral Contraceptive); ECP (Emergency Contraceptive Pill), MoS (Months of Stock), AMC (Average Monthly Consumption) • All above estimated MoS represents provincially procured and MoNHSR&C allocations from past USAID support • AMC** : Average Monthly Consumption calculated on last 12 months • ReOrder On : Estimated Date to order , for maintaining minimum stock level. • ReOrdering Quantity : Estimated quantity to be ordered. 				

The information includes:

- **Products:** display the FP product type.
- **Unit:** displays the unit measure for each product.
- **Status:** displays the stock location at the CWS, in the pipeline, or both.
- **Quantity:** displays the quantity of available stocks and the stocks in pipeline.

Hover over the icon to view the stock breakdown by funding source.

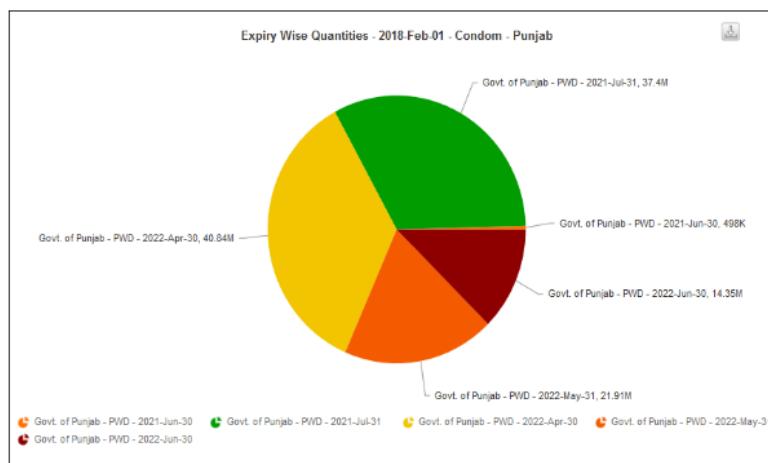

- **MOS:** displays the months of stock for each product with different colors to identify level of severity. The legends include:
 - Stock Out (0 - 4.99)
 - Under Stock (5 - 6.99)
 - Satisfactory (7 - 14.99)
 - Over Stock (15 - 9999999)
- The Transactional Data table also provides intelligence for when and how much needs to be ordered in the future for maintaining desired stock levels.

Transactional Data		
Products	Unit	Status
Condom (AMC**: 8,478,635.55) (CYP:54,710)	PCs	Stocks at CW&S Expiring on and after: Jun-2021
		Order 50,871,813 Condom PCs after 2 months to maintain the desired stock level
COC (AMC**: 709,561.80) (CYP:33,511)	Cycles	Stocks at CW&S Expiring on and after: May-2019
		Order 4,966,933 COC Cycles ASAP to maintain the desired stock level

In order to maintain optimum stock levels for each product, intelligent estimates are displayed for when and how much quantity needs to be ordered in future.

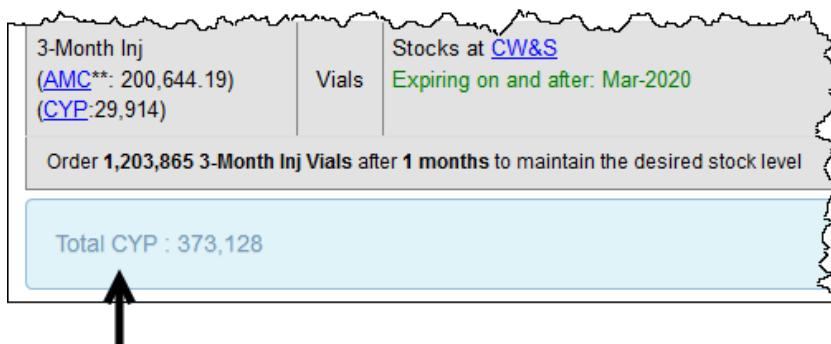

- The user can click on the Expiry information under the stock information to view the expiry-wise quantities graph, as shown in the image below:

Transactional Data			01-Feb-2018	
Products	Unit	Status	Quantity	MOS
Condom (AMC**: 8,478,635.55) (CYP:54,710)	PCs	Stocks at CW&S Expiring on and after: Jun-2021	■ 165,701,085	■ 19.54
Order 50,871,813 Condom PCs after 2 months to maintain the desired stock level				

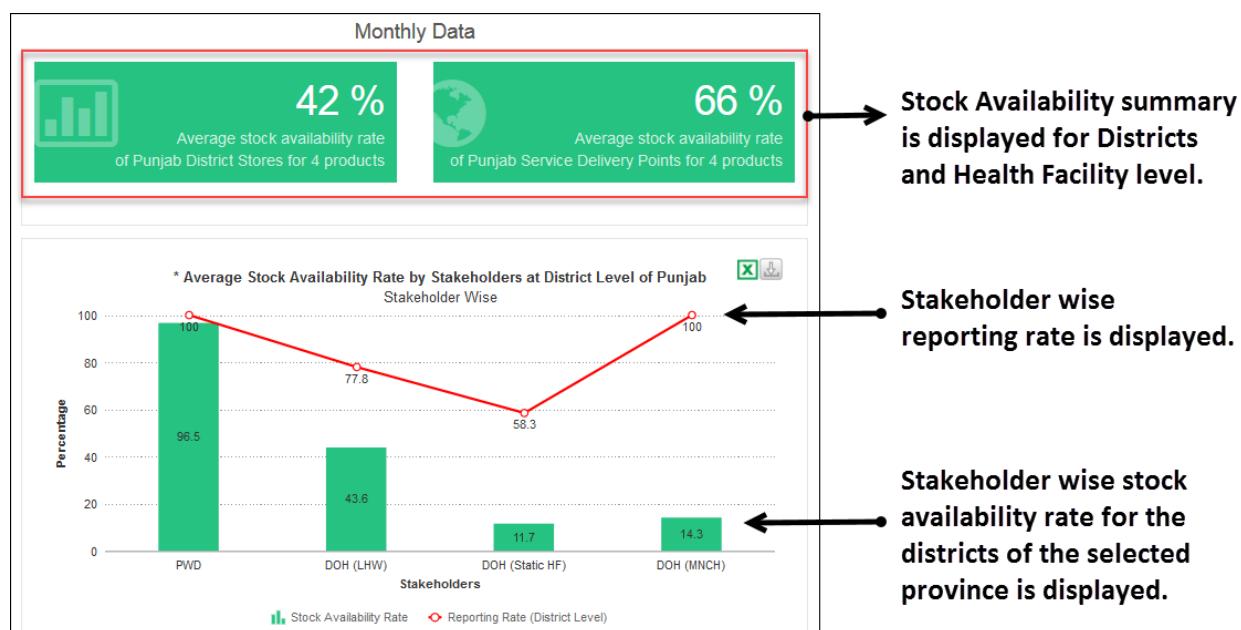

The user can also view the expiry-wise quantities of the product using the pie chart here.

- The bottom section displays the total CYP generated based on the data selected in the filter. For example, the CYP generated for Punjab for the month of February 2018 is displayed in the image below:

District Stores Stock Availability

The Monthly Data table is a comprehensive report that shows the stock availability rate at district stores of the selected province by stakeholder. The image below describes the information available in the graph report.

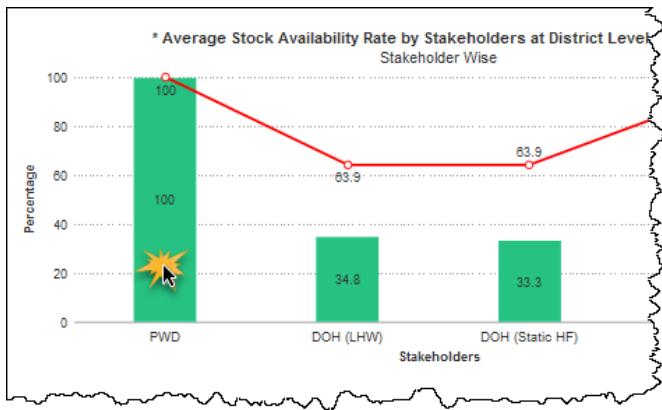

- Stock Availability Summary:** The Stock Availability Summary of key products is displayed at the district and SDP level at the top.
- Reporting Rate (District Level):** The stakeholder reporting rate is displayed as a red line. This enables decision-makers to analyze the credibility of the reported numbers through the district's reporting rate. A good reporting rate validates the stock availability information.

- **Stock Availability Rate at Districts:** The green bars display the stock availability rate in the districts of the selected province by stakeholder.

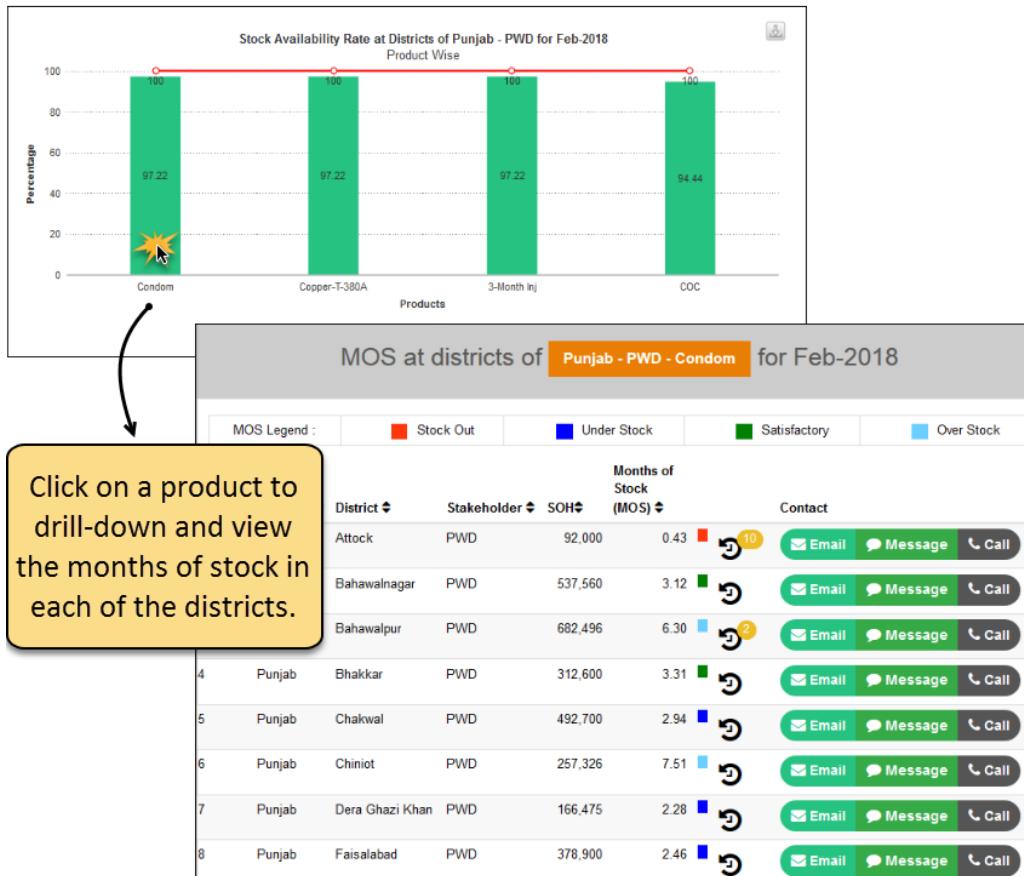

The user can click to export the graph to an Excel format and click to export the graph as a chart.

Click any of the green bars to view the stock availability rate of each stakeholder by product, as shown in the image below:

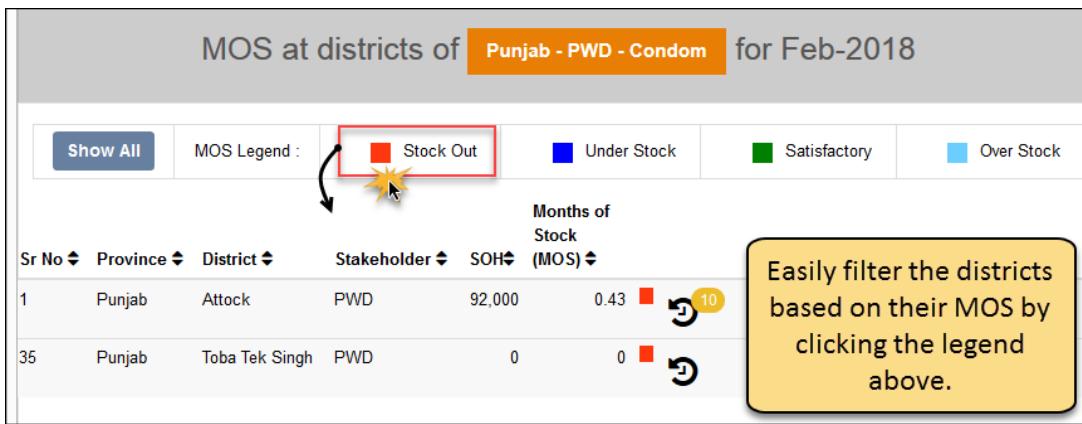

For the selected stakeholder, the stock status of each product will then be displayed in form of a bar graph as shown in the smaller table below.

The user can further drill down and click each of the products to view the months of stock for that product in each of the districts for the selected stakeholder. The user can view the following information:

- **Province:** displays the selected province.
- **District:** displays the districts in the province.
- **Stakeholder:** displays the relevant stakeholder.
- **SOH:** displays the Stock on Hand for the product.
Stock on Hand is the actual stock available in the district.
- **Months of Stock:** displays the months of stock of the product.
Months of stock refers to the sufficiency of stock in number of months.

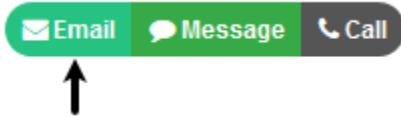

The user can click on the MOS legend on top to filter the districts based on their MOS, as shown in the image below:

- Contact:** The user can contact the focal person within the district to ask for more information or give instruction in order to balance stock on hand or prevent stock-out at a given facility.

Contact via Email

The user can contact the district focal person via email by clicking the email button.

The email dialog displays as shown in the image below:

Send Email

Write e-mail to : DPWO Attock
PWD - Attock - Punjab

Subject (131 chars left) Add subject here...

Message (980 chars left) Add message here....

Send

Specify the email **Subject** and **Message** and then click **Send** to send an email.

Contact via Message

The user can contact the focal person in the district via short message service (SMS) by clicking the Message button.

The Message dialog displays as shown in the image below:

Pakistan Logistics Management Information System - Contrac...

c.lmis.gov.pk/application/dashboard/send_sms.php 90%

Send SMS

Send SMS to : DPWO Attock
PWD - Attock - Punjab

Add your message text here...

Message (121 chars left)

Send

Specify the **Message** and then click **Send** to send an SMS.

Contact via Call

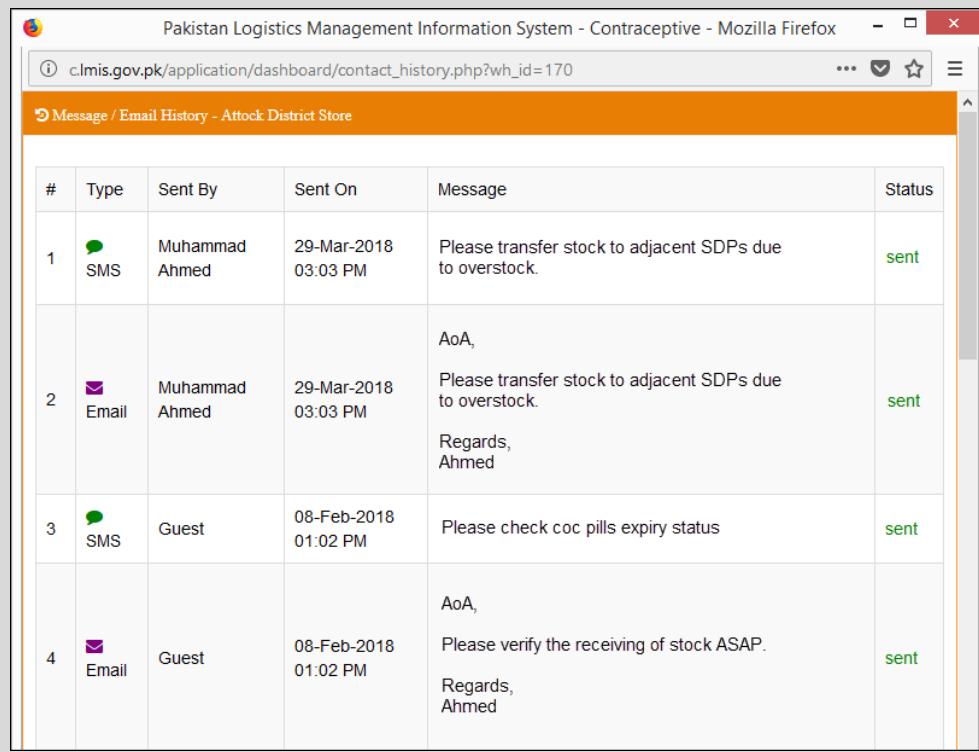

In the future, users will be able to call the focal person in the district by clicking on the call button, as shown in the image below:

This will enable the user to easily connect with the concerned person and verify the stock situation on hand.

Upcoming Feature!

View Correspondence History

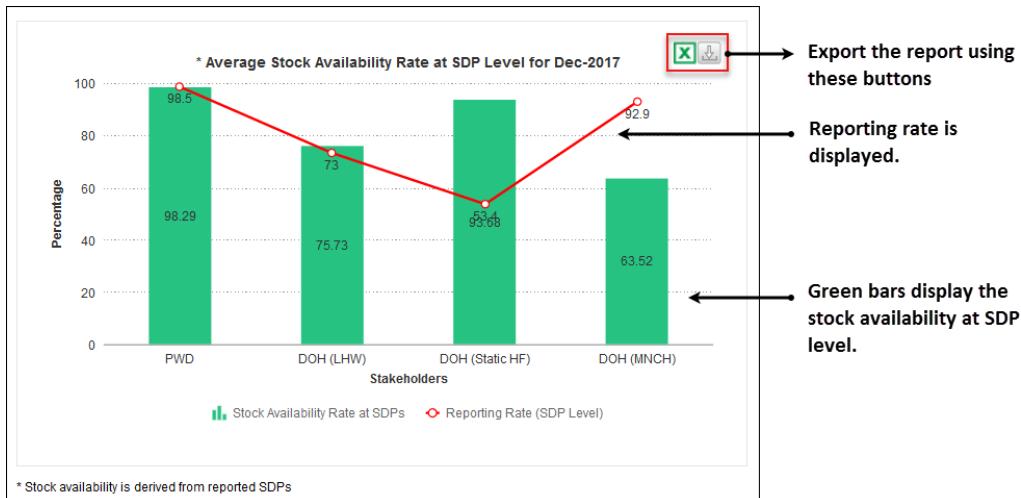

The users can view the correspondence history by clicking the  icon. The correspondence history is displayed for each district.

#	Type	Sent By	Sent On	Message	Status
1	 SMS	Muhammad Ahmed	29-Mar-2018 03:03 PM	Please transfer stock to adjacent SDPs due to overstock.	sent
2	 Email	Muhammad Ahmed	29-Mar-2018 03:03 PM	AoA, Please transfer stock to adjacent SDPs due to overstock. Regards, Ahmed	sent
3	 SMS	Guest	08-Feb-2018 01:02 PM	Please check coc pills expiry status	sent
4	 Email	Guest	08-Feb-2018 01:02 PM	AoA, Please verify the receiving of stock ASAP. Regards, Ahmed	sent

SDP Level Stock Availability

This report shows the average stock availability rate at the Service Delivery Point (SDP) level by stakeholder for the selected month along with the SDP's reporting rate.

- Stock Availability Rate at SDPs:** The green bars display the stock availability rate by stakeholder at the SDP level in the districts of the selected province.
- Reporting Rate (SDP Level):** The reporting rate by stakeholder is displayed as a red line, that enables decision-makers to analyze the credibility of the reported numbers through the SDP reporting rate. A good reporting rate validates the stock availability information.

The user can click to export the graph in an Excel format and click to export the graph as a chart.

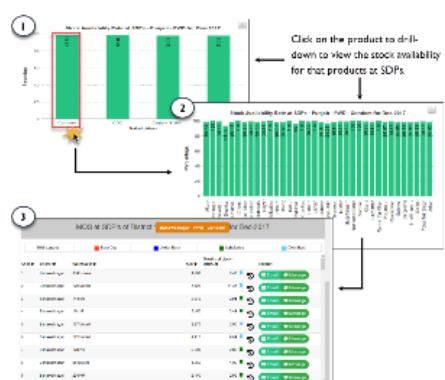

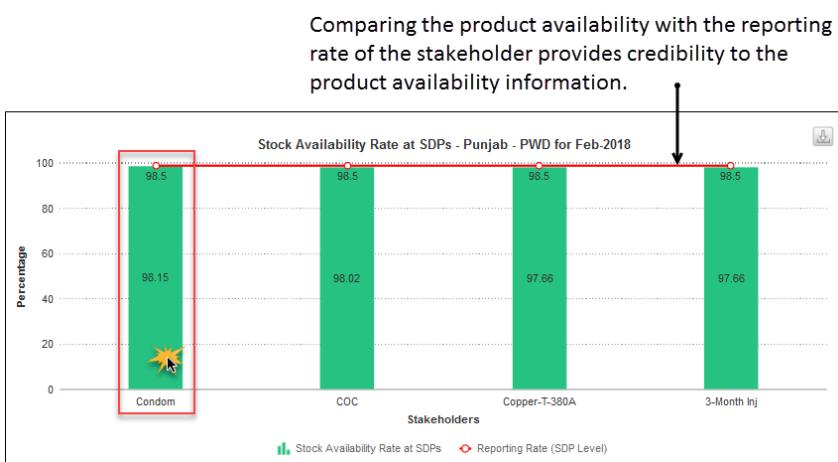

To analyze SDP stock sufficiency:

1. Click any of the green bars to view product stock availability rate of each stakeholder, as shown in the image below:

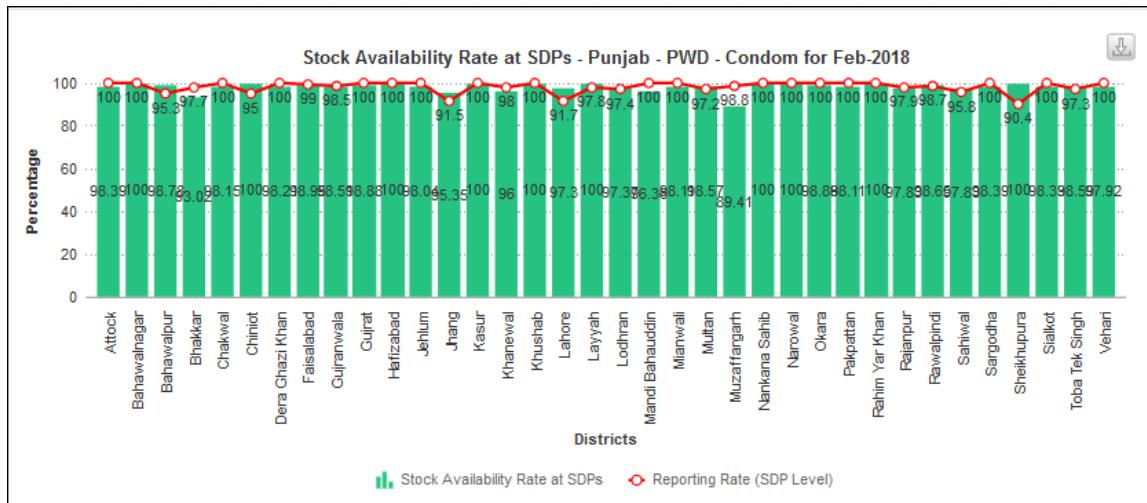

- Click on the stakeholder to view the product stock availability status in the form of a bar graph. The reporting rate is also displayed which helps provide credibility to the product availability statistics. A 100% reporting rate indicates that the stock availability information is reliable and correct.

See image below for more information:

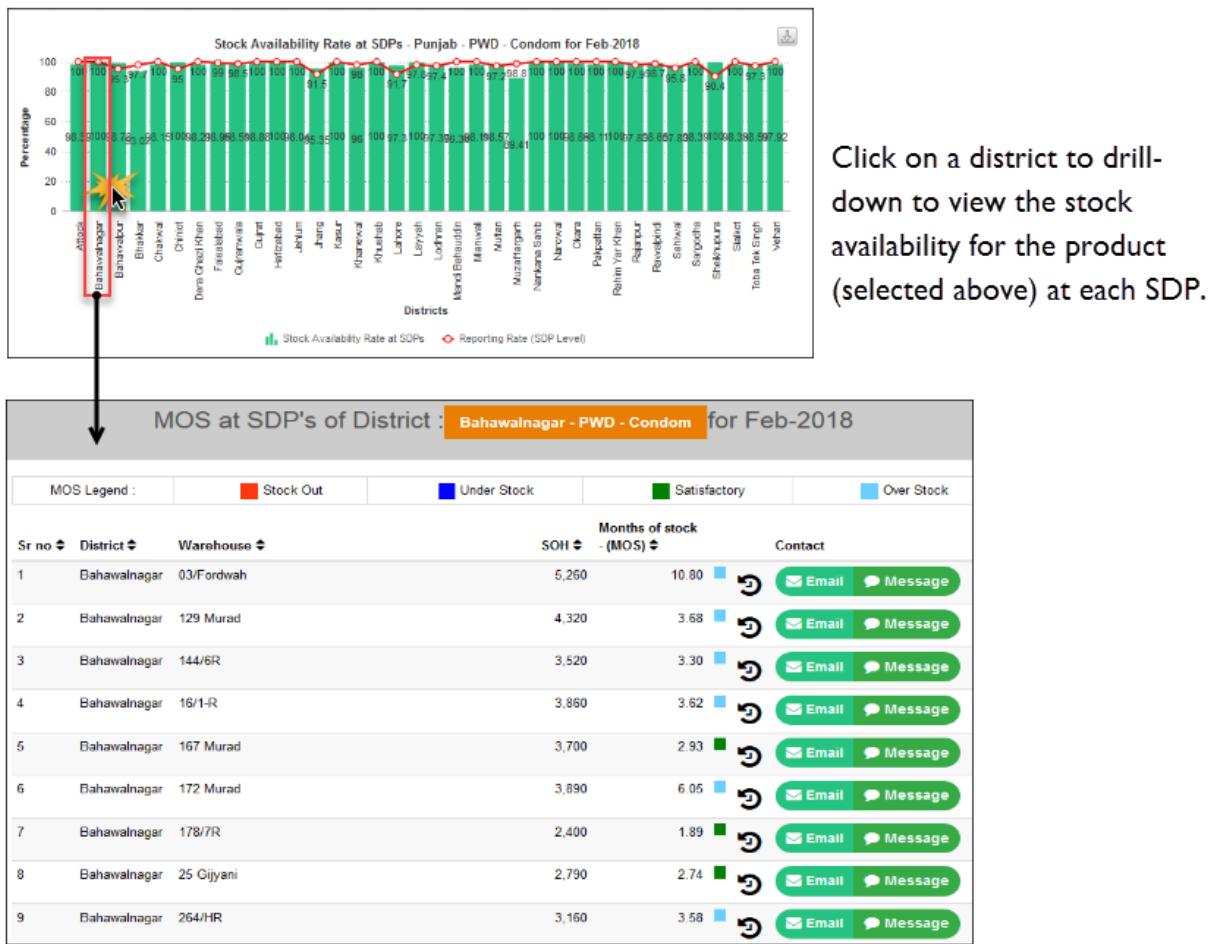

3. Click on the product to further drill down to view the selected product's availability at each District for the selected stakeholder and province. This information is also clubbed with the District's reporting rate being shown as a red line.

The user can scroll down to view the district's contact list. This makes it easier for the user to contact the focal person at the district for any inquiry. The contact list also provides the 'Reporting Rate' and the 'Stock Availability Rate' of each district as shown in the image below:

Districts Contact List PWD - Condom				
#	District	Reporting Rate	Stock Availability Rate	Action
1	Attock	100.00 %	98.39 %	✉ Email 💬 Message
2	Bahawalnagar	100.00 %	100.00 %	✉ Email 💬 Message
3	Bahawalpur	95.35 %	98.78 %	✉ Email 💬 Message
4	Bhakkar	97.73 %	93.02 %	✉ Email 💬 Message
5	Chakwal	100.00 %	98.15 %	✉ Email 💬 Message
6	Chiniot	95.00 %	100.00 %	✉ Email 💬 Message
7	Dera Ghazi Khan	100.00 %	98.21 %	✉ Email 💬 Message

- The user can click on 'Email' to contact via email or click on 'Message' to send a text message to the district focal person for any desired action. Refer to the '[Contact via Email](#)' and '[Contact via Message](#)' for more information.
- Clicking on the 'Stock Availability Rate' of any district displays the Months of Stock for relevant SDPs, as shown in the image below:

The user can view the following information:

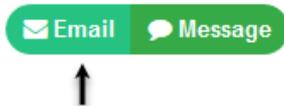

- District:** displays the districts in the province.
- Warehouse:** displays the area where the warehouse is located.
- SOH:** displays the Stock on Hand for the product.
Stock on Hand is the actual stock available at the SDP.
- Months of Stock (MOS):** displays the months of stock for the product.
Months of stock refers to the sufficiency of stock in number of months.

- **Contact:** The user can even contact the SDP in the district to confirm stock levels and ask for further information.

-  : The user can click on this icon to view the correspondence history via email and text messages.

Contact via Email

The user can contact the SDPs of the district via email by clicking the email button.

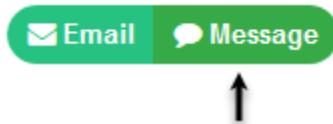

The email dialog displays as shown in the image below:

A screenshot of a 'Send Email' dialog box. It has a blue header bar with the title 'Send Email'. The main area contains fields for 'Write e-mail to' (DPWO Attock, PWD - Attock - Punjab), 'Subject' (Add subject here...), and 'Message' (Add message here....). A character counter indicates 131 chars left for the subject and 980 chars left for the message. At the bottom is a blue 'Send' button.

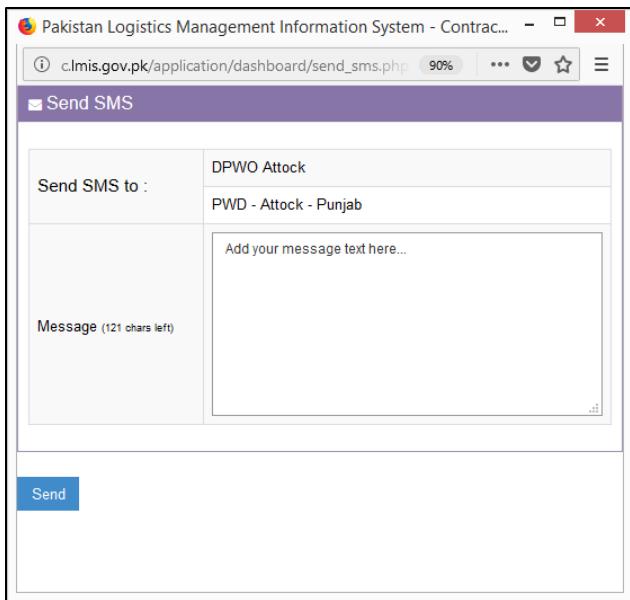

Specify the email **Subject** and **Message** and then click **Send** to send an email.

Contact via Message

The user can contact the district via SMS by clicking the Message button.

The Message dialog displays as shown in the image below:

Specify the **Message** and then click **Send** to send an SMS¹.

In case of any further information, please contact our support representative at support@lmis.gov.pk.

¹ The CALL feature currently is not available for the SDP level in the FP Executive Dashboard. However, it would be included as the module evolves.

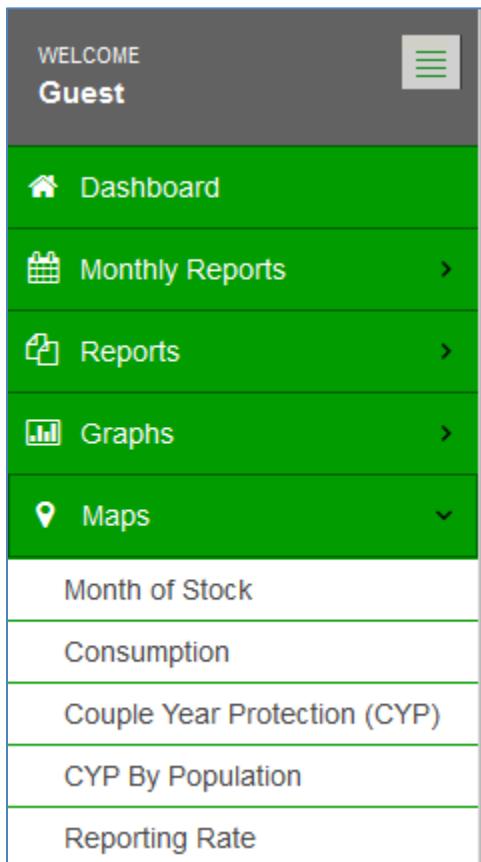

6

Maps

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions for using the maps features of the Contraceptive Logistics Management Information system.

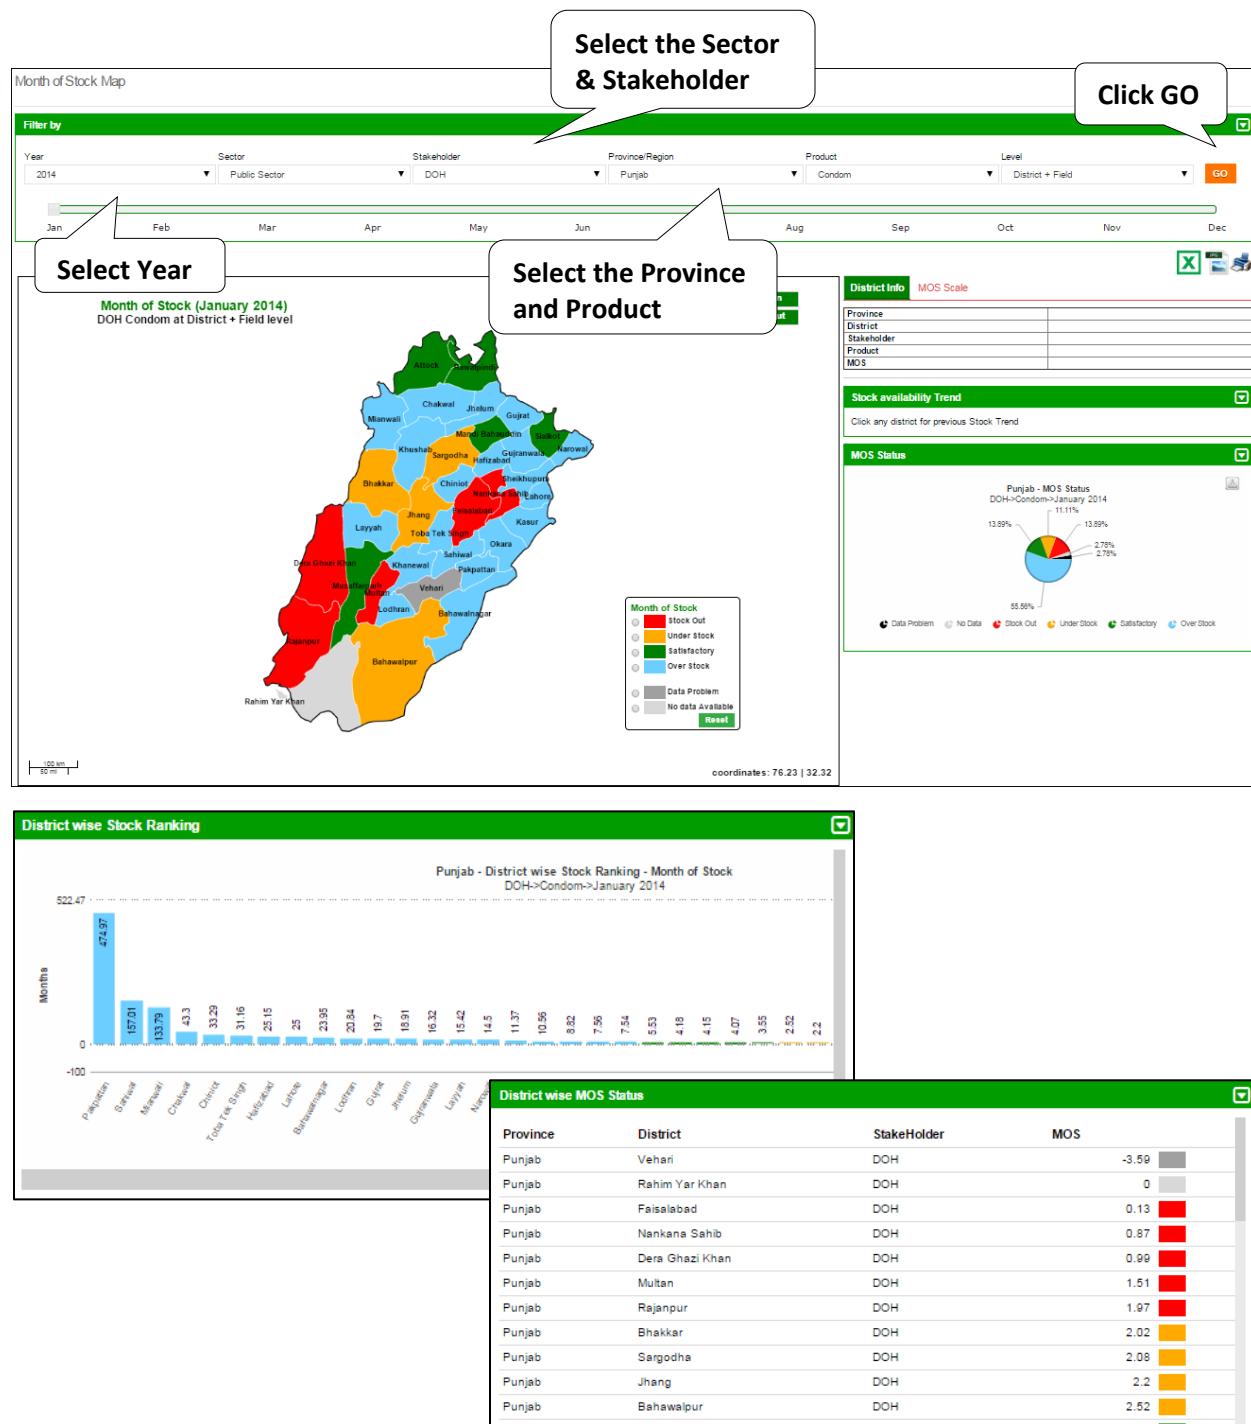

The cLMIS also has the capability of generating easy to interpret maps. Maps can be viewed by selecting the “Maps” tab. The drop down menu will display:

Once a maps is selected, the user is directed towards a page from where s/he can choose various options to generate maps.

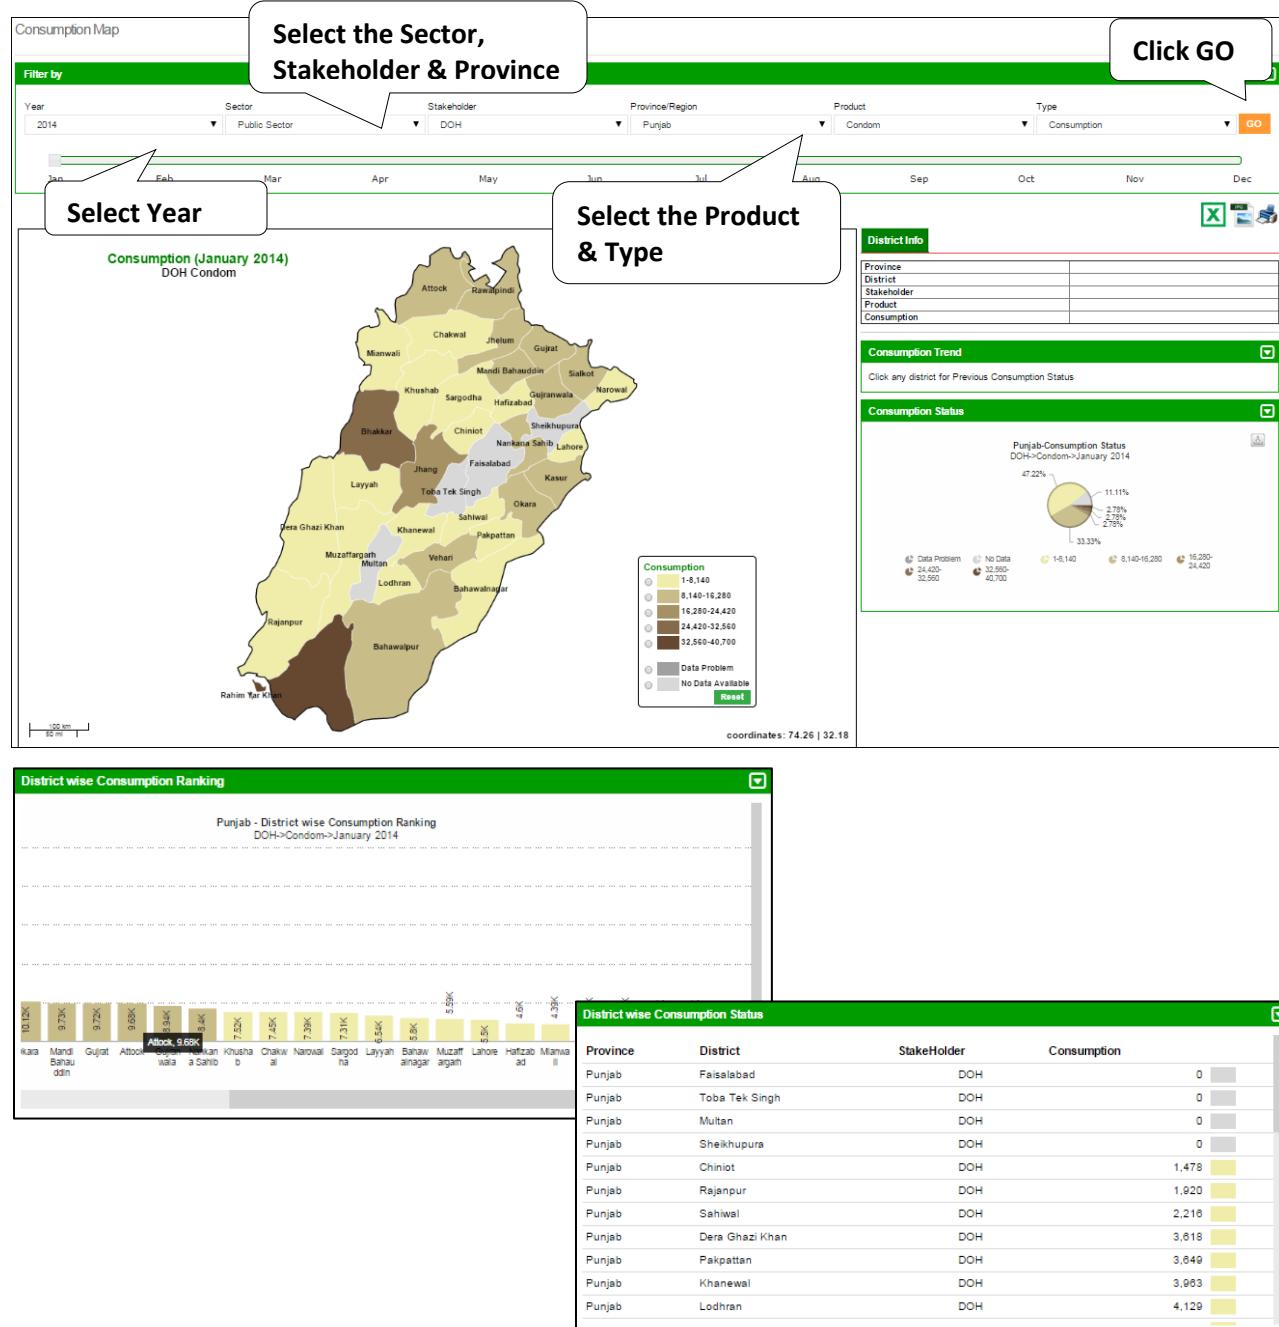

Month of Stock Map

The Month of Stock (MOS) map provides many filter options to the user. Users can select Year, Province/Region, Product as well as Level to analyze MOS for each district in the selected province. The month can be selected from the time bar to compare the MOS trends in selected district for each month. The detailed information can be seen once the user clicks a particular district on the map.

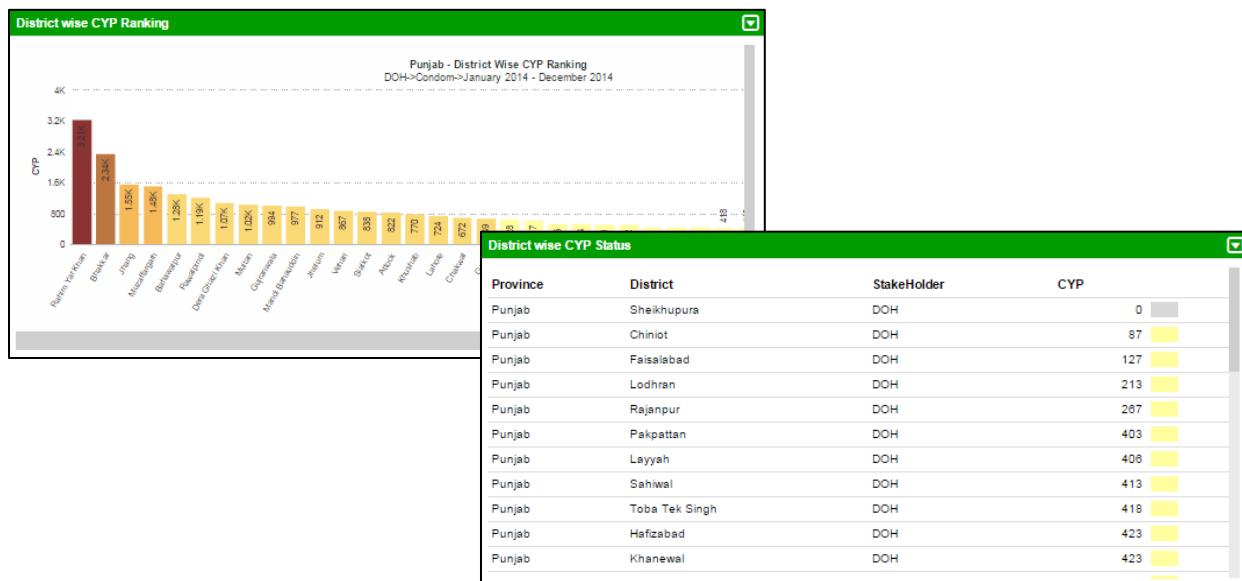

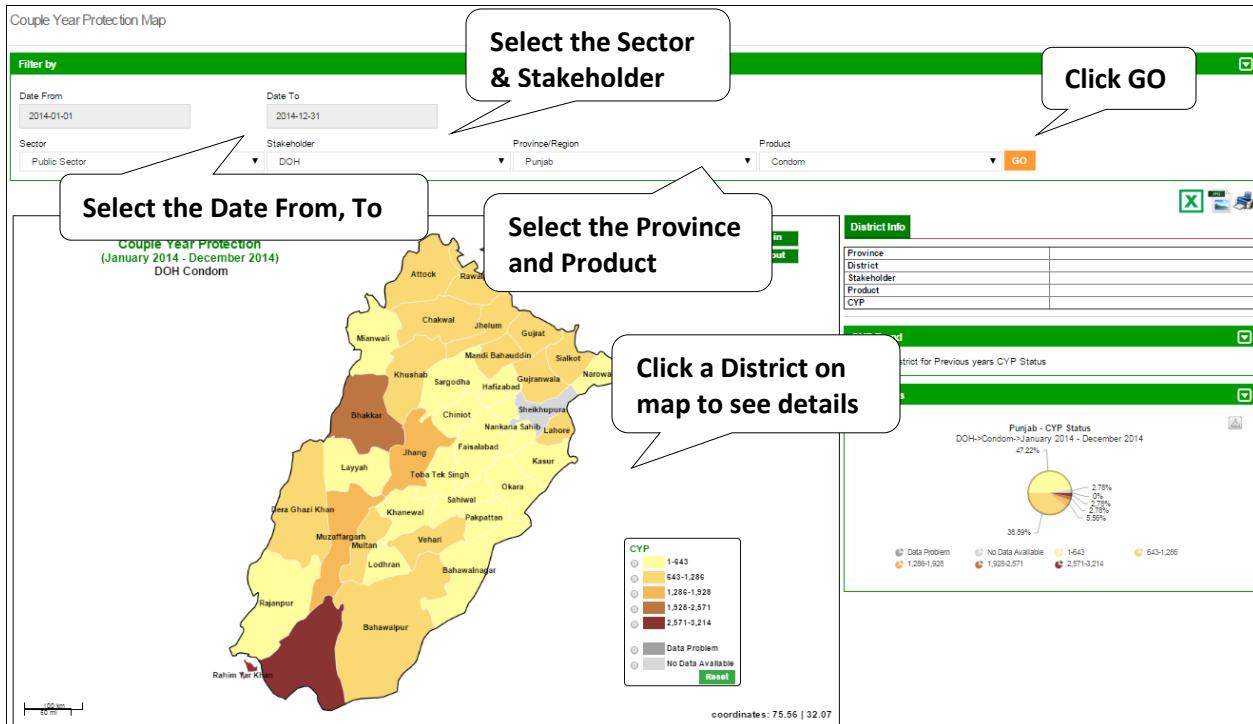

Consumption Map

The Consumption map provides users with filter options such as Year, Sector, Stakeholder, Province/Region, Product as well as Type (Consumption and Avg. Monthly Consumption) to analyze product consumption for each district in the selected province. The month can be selected from the time bar to compare the consumption trends in selected district for each month. The detailed information can be seen once the user clicks a particular district on the map.

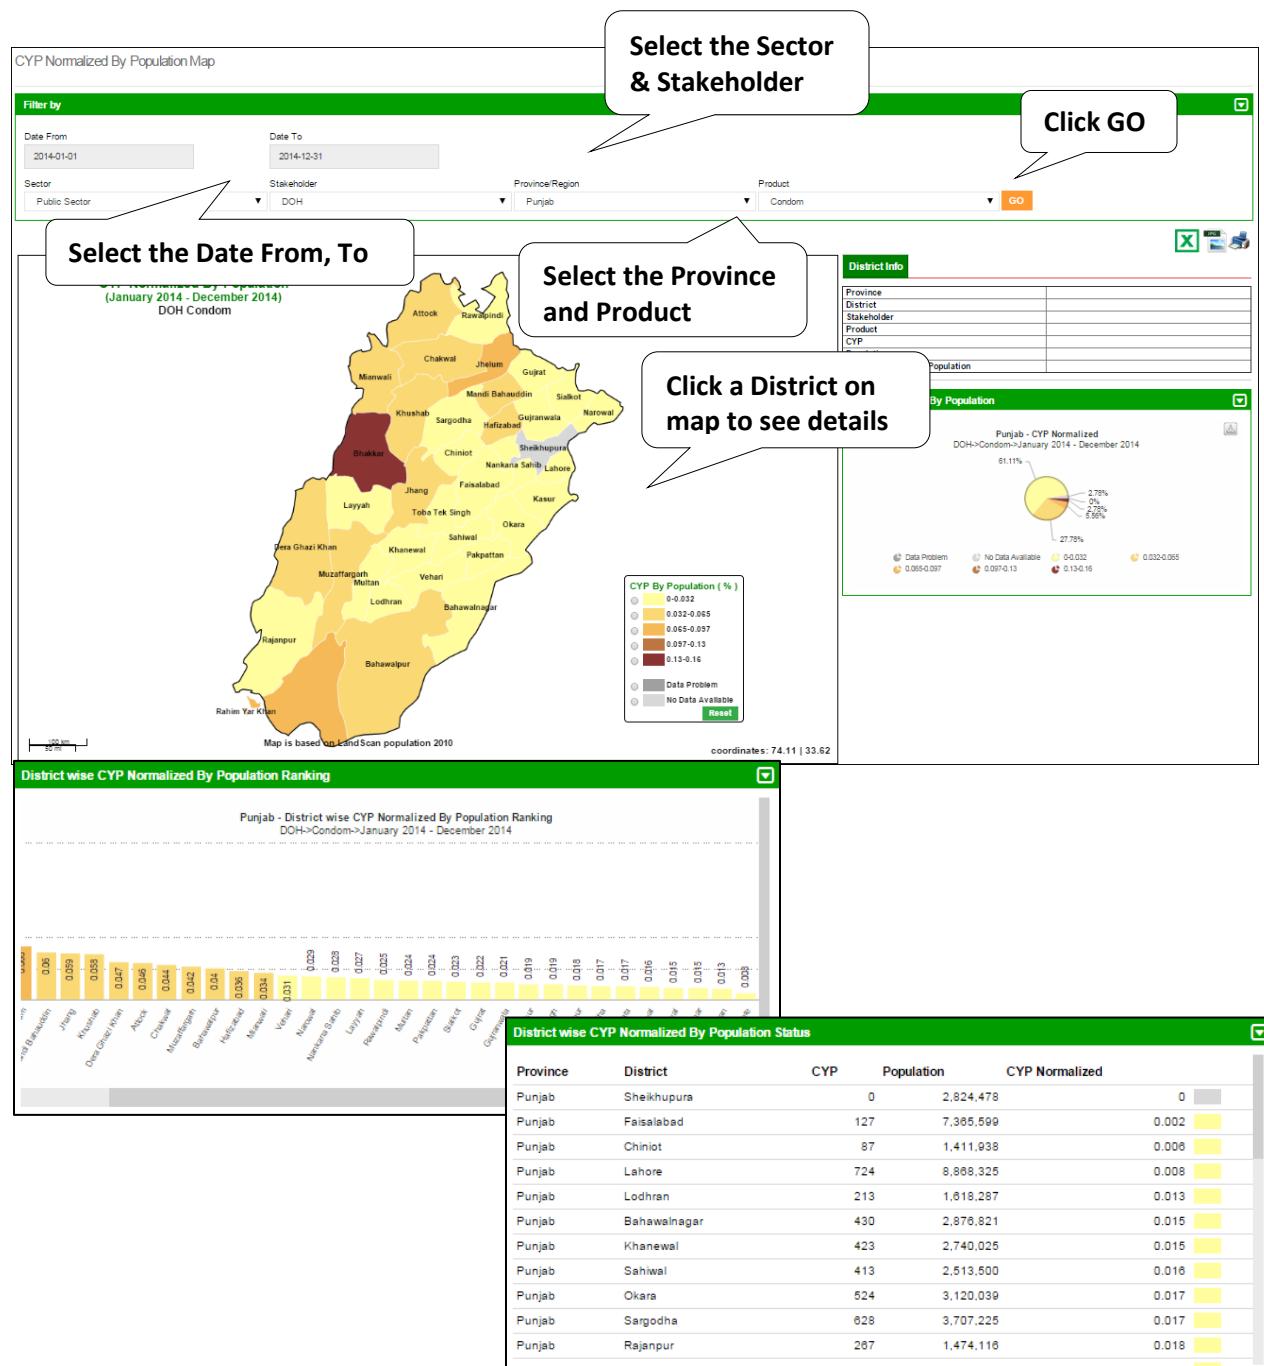

Couple Year Protection Map

The Couple Year Protection map provides users with filter options such as Date from, Date to, Sector, Stakeholder, Province/Region and Product to analyze number of couples protected for each district in the selected province. The detailed information can be seen once the user clicks a particular district on the map.

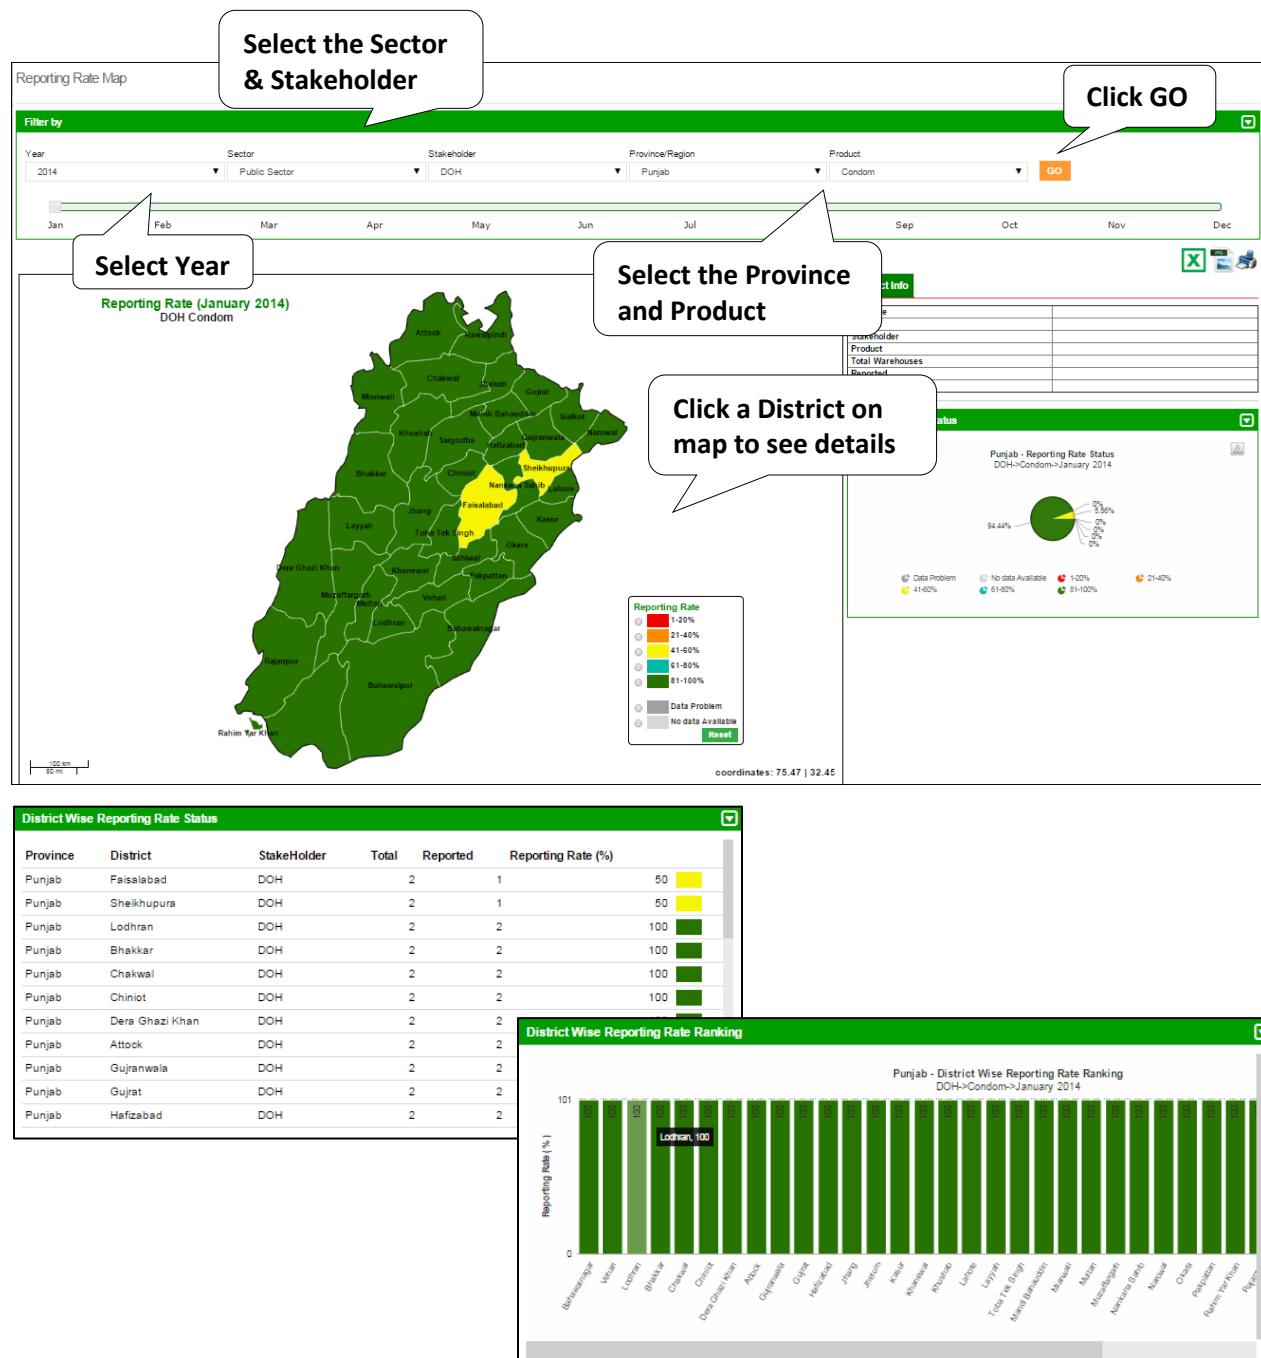

CYP by Population Map

The Couple Year Protection map can also be normalized based on the population of the province. It provides users with filter options such as Date from, Date to, Sector, Stakeholder, Province/Region and Product to analyze number of couples protected for each district in the selected province based on the population of that district. The detailed information can be seen once the user clicks a particular district on the map.

Reporting Rate Map

The Reporting rate map shows the number of stores and facilities which have provided the monthly report for each district. Users can see filter options such as Year, Sector, Stakeholder, Province/Region and Product to analyze the reporting rate for each district in the selected province based on the number of facilities in that district. The month can selected from the time bar to compare the consumption trends in selected district for each month. The detailed information can be seen once the user clicks a particular district on the map.

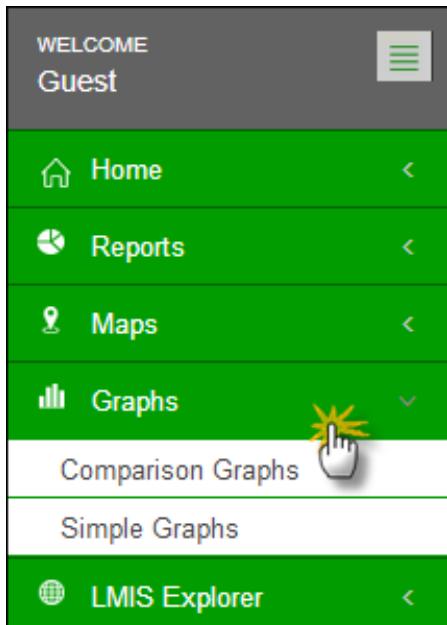

7

Graphs

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions for using the graph features of the Contraceptive Logistics Management Information system.

The cLMIS also has the capability of generating easy to interpret graphs. Simple and comparative graphs can be viewed by selecting the “Graphs” tab. The drop down menu will display:

Once a simple or comparison graphs is selected, the user is directed towards a page from where s/he can choose various options to create graphs.

Comparison Graphs

The Graph Comparison Report page includes different filters and options to compare graphs to generate reports. Once the user clicks the 'Indicators', it gives four options to select from: reformat

- CYP (Couple Year Production)
- Dispensed
- MOS(Month Of Stock)
- On Hand

Select
Indicators

Indicators:	
CYP	Couple Year Protection ▼
Couple Year Protection	
Dispensed	Consumption
	Avg Monthly Consumption
MOS	Months Of Stock - Field
	Month of Stock - Whse
	Months of Stock - Total
OnHand	Stock On Hand - Field
	Stock On Hand - Whse
	Stock On Hand - Total

Once user clicks the 'Compare options', it will give the user three options.

- Years
- Stakeholder
- Geographical

Select Comparison options of Years,
Stakeholder and Geographical
location

Indicators:	
Couple Year Protection	▼
Compare Options	
Years	Year - National ▼
Year - National	
Year - Provincial	
Year - District	
Stakeholder	Stakeholder - National
	Stakeholder - Provincial
	Stakeholder - District

Once the user clicks 'Stakeholder', it will show the list of all stakeholders to choose from.

Select the
Stakeholder

Stakeholder :	
All Stakeholders	▼
All Stakeholders	
PWD	
LHW	
DOH	
PPHI	
MSS	
GS	
FPAP	
DKT	
MCHIP	
MNCH	
CMIPHC	

Products and Year show multiple options to select. The user can choose more than one product and year respectively. By clicking on **Time-Interval** it shows three options:

- Quarter
- Half
- Annual

By clicking on Chart type it shows two options:

- Line Chart
- Bar Chart
- Spline Chart

The screenshot shows a user interface for generating a report. On the left, five callout boxes provide instructions for selecting various parameters:

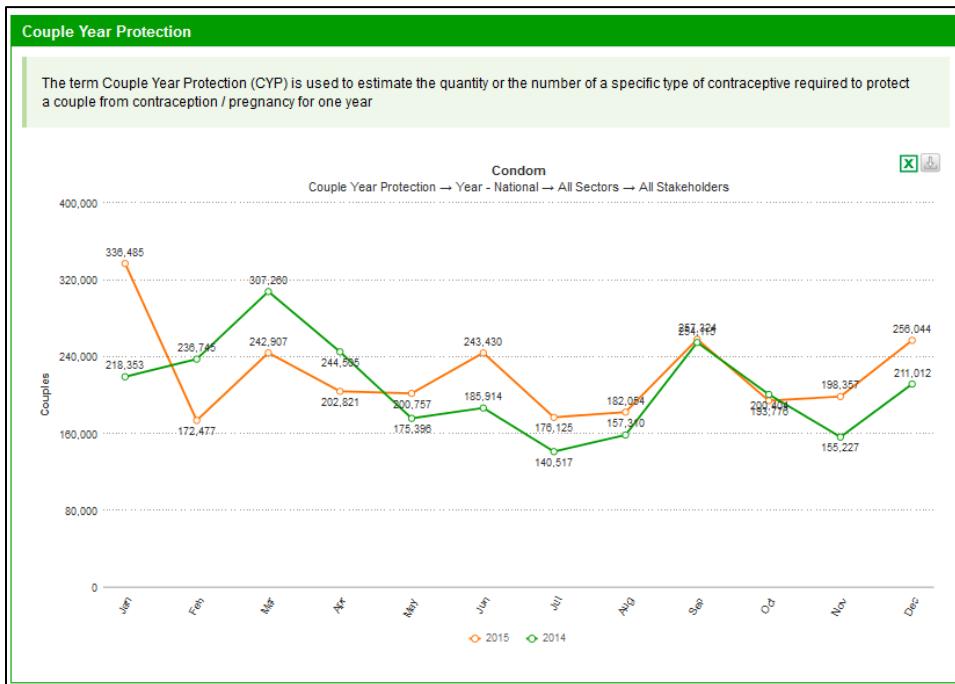

- Select comparison options** (points to the **Compare Options** dropdown menu)
- Select multiple products for comparison** (points to the **Products** dropdown menu, which lists 1-Month Inj, 2-Month Inj, 3-Month Inj, Implanon, Jadelle, and Fazista)
- Select time Intervals** (points to the **Time Interval** dropdown menu, set to First Quarter)
- Select Line, spline or Bar** (points to the **Chart Type** dropdown menu, set to Line)
- After selecting all values, click here to generate report.** (points to the **Generate Report** button)

The main interface includes the following sections:

- Indicators:** Couple Year Protection
- Compare Options:** Year - National
- Stakeholder:** All Stakeholders
- Products:** 1-Month Inj, 2-Month Inj, 3-Month Inj, Implanon, Jadelle, Fazista
- Time Interval:** First Quarter
- Years:** 2015, 2014, 2013, 2012, 2011
- Chart Type:** Line
- Generate Report** button (highlighted in green)

Line Chart

If the user selects line chart, it will generate graph like this:

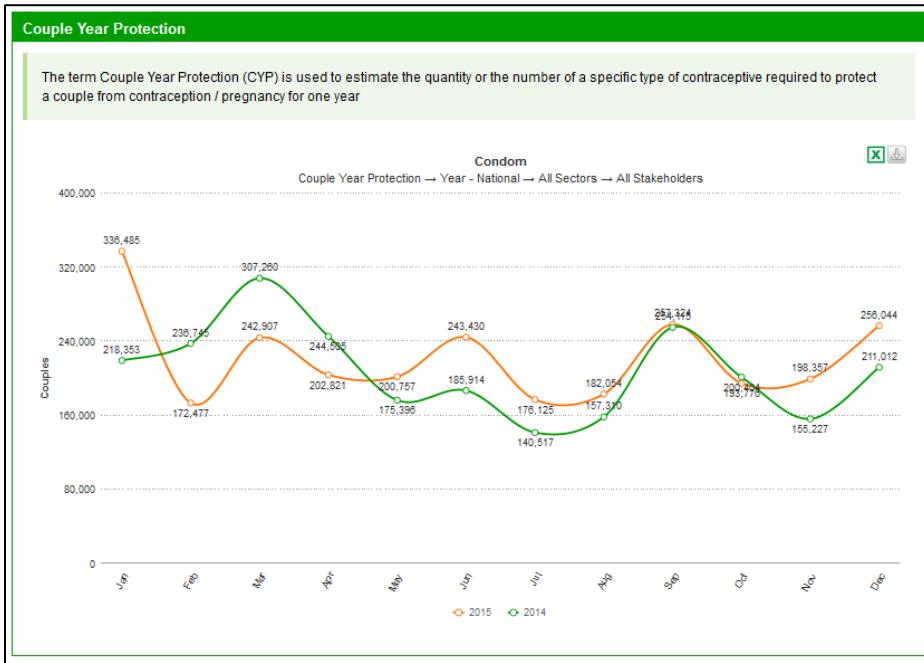

Bar Chart

If the user selects bar chart, it will generate a graph like this:

Spline Chart

Simple Graphs

Users can also choose the same filter options to create a simple graph.

LMIS Explorer

8

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions for using the cLMIS explorer features. In the cLMIS explorer, the user can see monthly *district* warehouse or field store reports and data. If there is no data, a message will be shown.

Monthly Store/Facility Report for Stakeholder = 'PWD' Province = 'Punjab' District = 'Attock' and Store/Facility = 'Attock District Store' (April 2016)													
Sr. No.	Province	District	Stakeholder	Store/Facility	Product	Opening Balance	Received	Issued	Adjustments (+)	Adjustments (-)	Closing Balance	Last Modified	
1	Punjab	Attock	District PWD	Attock District Store	Condom	804,712	162,000	139,800	0	0	826,912	03/05/2016 10:48 AM	
2	Punjab	Attock	District PWD	Attock District Store	POP	72	720	0	0	0	792	03/05/2016 10:48 AM	
3	Punjab	Attock	District PWD	Attock District Store	COC	9,093	2,880	2,180	0	0	9,793	03/05/2016 10:48 AM	
4	Punjab	Attock	District PWD	Attock District Store	ECP	864	1,400	160	0	0	2,104	03/05/2016 10:48 AM	
5	Punjab	Attock	District PWD	Attock District Store	Copper-T-380A	2,205	600	95	0	0	2,710	03/05/2016 10:48 AM	
6	Punjab	Attock	District PWD	Attock District Store	Multiload	20	0	20	0	0	0	03/05/2016 10:48 AM	
7	Punjab	Attock	District PWD	Attock District Store	2-Month Inj	0	0	0	0	0	0	03/05/2016 10:48 AM	
8	Punjab	Attock	District PWD	Attock District Store	3-Month Inj	2,865	1,200	565	0	0	3,500	03/05/2016 10:48 AM	
9	Punjab	Attock	District PWD	Attock District Store	Implanon	64	0	0	0	0	64	03/05/2016 10:48 AM	
10	Punjab	Attock	District PWD	Attock District	Iudelle	0	0	0	0	0	0	03/05/2016	

Similarly, the user can view monthly *field* reports and data. If there is no data for that selected field, it will show zeroes for that specific month.

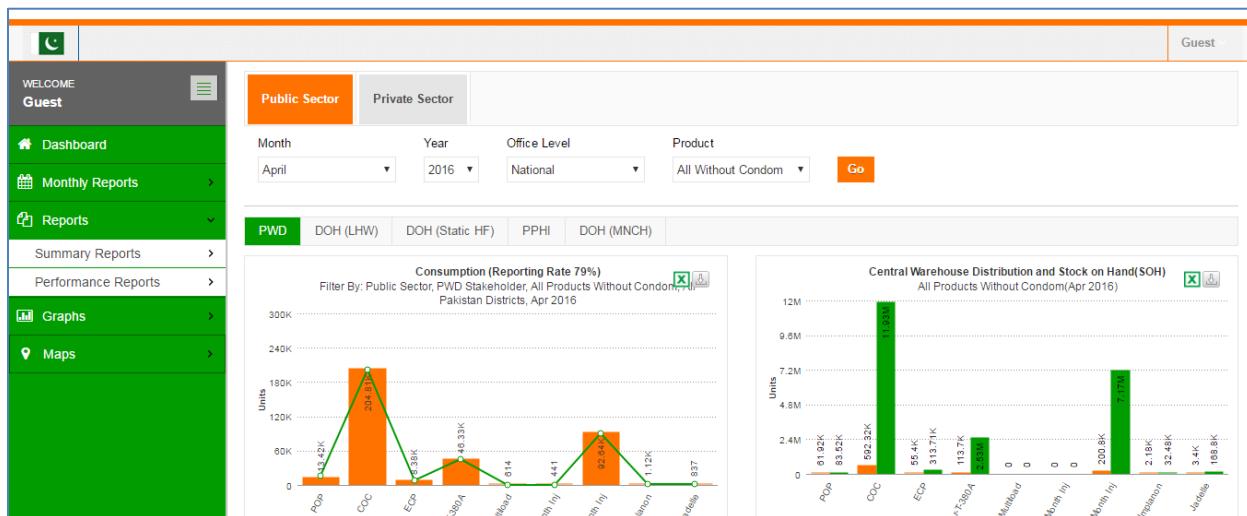

Guest Users

9

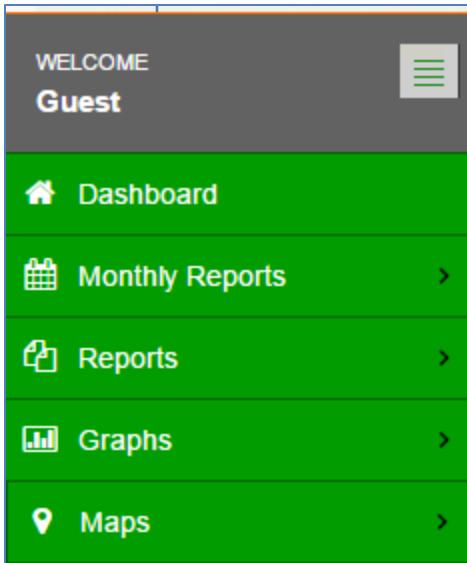

in Contraceptive Logistics Management Information System

This section explains the step-by-step instructions for the functions and features that can be used by Guest Users of the Contraceptive Logistics Management Information system. The Contraceptive Logistics Management Information System enables users to login as a guest or anonymous user. Guest users can login into LMIS by entering username and password as 'guest'. When a guest user enters login credentials, they can view analytical reports, maps, graphs and warehouse/district stores data report entered by specific stakeholders for any period. However, they are not entitled to edit the data.

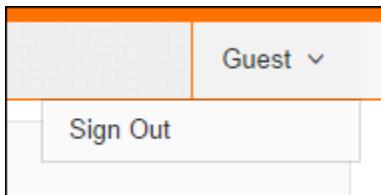

Logging in as a Guest User shows the following dashboard screen:

On the left side of the dashboard screen, the guest user will see the following tabs:

- **Guest:** Users can sign out of the application by using the following link on the right side of the screen:

- **Dashboard:** Users can view dashboards containing graphs, maps and analytical reports by using this tab.
- **Reports:** Users can view analytical reports by using this tab.
- **Maps:** Users can also view the analytical reports in the form of a map by using this link.
- **Graphs:** Users can view simple and comparable graphs by using this link.
- **LMIS Explorer:** This link allows users to view individual warehouse / store data for a selected month.

DOH District User

10

in Contraceptive Logistics Management Information System

This section explains overview of the authenticated users on the district level for department of health (DOH) and describes the tasks they can perform while using the cLMIS.

In order to log on to the system, the user will be allocated a username and password. Once successfully logged in, the user will be directed to a ‘user information’ page specific to the organization. This page will contain specific information about the user’s department or organization.

System Users are defined by relevant stakeholders and the level in the supply chain they represent. After a successful login, the user will be directed to stakeholder specific page. Based on the privileges assigned to the user by the system administrator, various menu items will appear on the interface homepage.

After a successful login, district users will see the following menu:

The screenshot shows the EDO(H) Multan Public Sector Dashboard. The top navigation bar includes the logo, 'Contraceptive (cLMIS)', 'Pakistan Logistics Management Information System', and a 'Training Manuals' link. The main menu on the left lists 'Home', 'Requisitions', 'Data Entry', 'Monthly Reports', 'Reports', 'Graphs', and 'Maps'. The dashboard features two main sections: a reporting section on the left and a distribution stock section on the right. The reporting section displays a bar chart titled 'Public Sector: PWD Stakeholder (All Products) Reporting Rate (66.7%)' comparing reporting rates for various products across different districts. The distribution stock section displays a bar chart titled 'Central Warehouse Distribution and Stock on Hand(SOH) All Products (Feb 2015)' showing stock levels for various products in units.

- **EDO(H) Multan:** Name of the User who is currently logged in.
- **Sign Out:** signs out the user to homepage of LMIS.

- **Change Password:** It allows user to change the password.
-  **Home**: By clicking this icon, users will reach the dashboard page which appeared just after logging in.
- **Requisitions:** Users can add or view requisition requests.
- **Data Entry:** Users can enter monthly reports by using this menu item.
- **Monthly Reports:** Users can view warehouse / stores reports by using this menu item.
- **Reports:** Users can view pre-published analytical reports.
- **Graphs:** Users can view pre-published graphs.
- **Maps:** User can view analytical reports in the form of maps.

User can now click **Home** to view Dashboard.

Dashboard

The Dashboard is a visual display of the most important system analysis. It serves multiple data functions which are consolidated and arranged on a single screen so the information can be viewed at a glance.

District users can view the following dashboards by default:

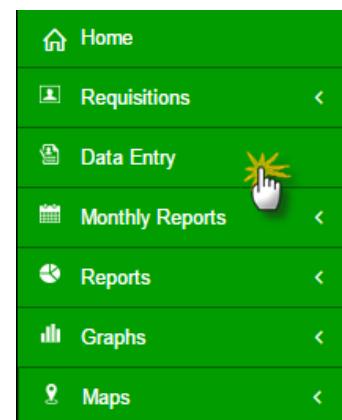

- Public Sector Stakeholders
- Private Sector Stakeholders

Please refer to the “Dashboards” chapter above.

Data Entry (Monthly Stock Consumption)

In order to add monthly stock consumption reports, click the Data Entry tab on the main menu.

The data entry screen will be displayed.

To enter consumption data, click Health Facility Name.

Consumption Data Entry

Requisitions

EDO (H) uses the Stock Requisitions form to request commodities from CW&S. EDO (H) staff prepares this requisition form on a quarterly basis in consultation with the storekeeper. This form indicates the stock status and consumption during the quarter and indicates the quantity request for each contraceptive being used in respective districts.

The district store users were required to fill out Requisition (CLR-6) based on the previous consumption of that district and submit to the Central Warehouse. However, in Release-2 of cLMIS, Requisition (CLR-6) is auto generated using previous consumption trends for the required quantity of products for the next quarter.

New Requisition

The New Requisition (CLR-6) auto-fills the fields by using previous consumption data of a district in a selected quarter. This form was previously filled by the requester. District users can create requisitions and electronically submit them to the central warehouse. These requisitions will be reviewed by the central warehouse management and stock will be issued as per availability and approved.

LHW District User

11

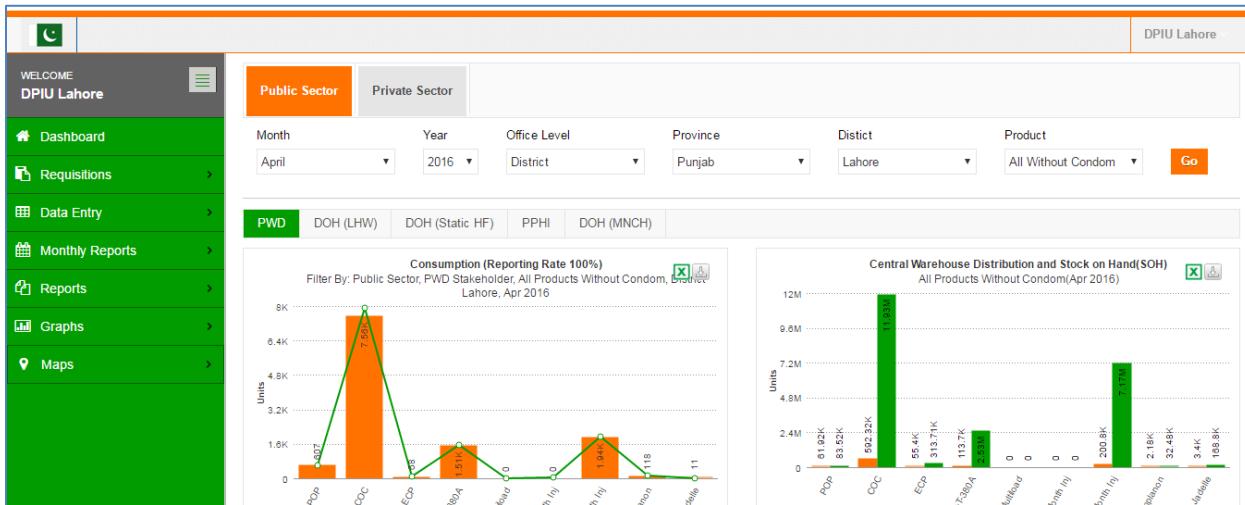

in Contraceptive Logistics Management Information System

This section explains overview of the authenticated users on the district level for Lady Health Workers (LHW) program and describes the tasks they can perform while using the cLMIS.

In order to log on to the system, the user will be allocated a username and password. Once successfully logged in, the user will be directed to a ‘user information’ page specific to the organization. This page will contain specific information about the user’s department or organization.

System Users are defined by relevant stakeholders and the level in the supply chain they represent. After a successful login, the user will be directed to stakeholder specific page. Based on the privileges assigned to the user by the system administrator, various menu items will appear on the interface homepage.

After a successful login, district users will see the following menu

- **DPIU Attock:** Name of the User who is currently logged in.
- **Sign Out:** signs out the user to homepage of LMIS.
- **Change Password:** It allows user to change the password.

-  **Home**: By clicking this icon, users will reach the dashboard page which appeared just after logging in.
- **Requisitions:** Users can add or view requisition requests.
- **Data Entry:** Users can enter monthly reports by using this menu item.
- **Monthly Reports:** Users can view warehouse / stores reports by using this menu item.
- **Reports:** Users can view pre-published analytical reports.
- **Graphs:** Users can view pre-published graphs.
- **Maps:** User can view analytical reports in the form of maps.

User can now click **Home** to view Dashboard.

Dashboard

The Dashboard is a visual display of the most important system analysis. It serves multiple data functions which are consolidated and arranged on a single screen so the information can be viewed at a glance.

District users can view the following dashboards by default:

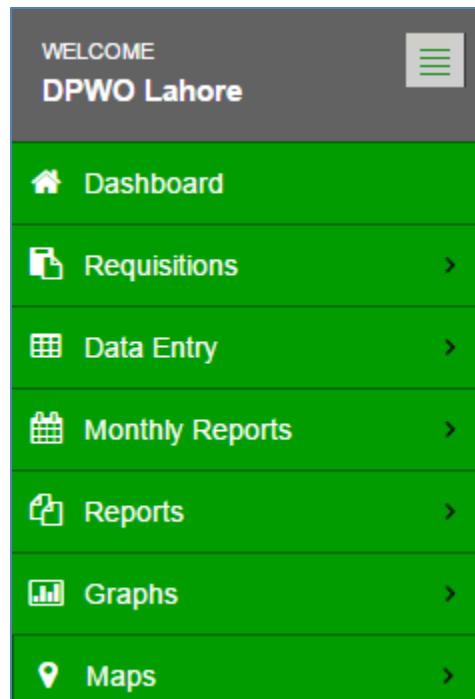

- Public Sector Stakeholders
- Private Sector Stakeholders

Please refer to the “Dashboards” chapter above.

Data Entry (Monthly Stock Consumption)

In order to add monthly stock consumption reports, click the Data Entry tab on the main menu.

The data entry screen will be displayed.

The facility data entry screen will be displayed. To enter consumption data for a health facility, click the health facility name (**DHQ Attock**) as shown in the screenshot

Monthly Reports

District Users can view monthly reports of facilities / stores assigned to them as well as view reports of stores present in other districts.

My Reports

Users can view submitted reports by clicking “My Reports” and select any of his/her assigned facilities /stores to view data of that particular month.

A screenshot of a web-based reporting interface titled "View Monthly Store/Facility Report". It features a "Filter by" section with three dropdown menus: "Month" (set to "JANUARY"), "Year" (set to "2015"), and "Store/Facility" (set to "Peshawar Field"). Below the "Store/Facility" dropdown is a small dropdown menu with options: "Select", "Peshawar", and "Peshawar Field Office" (which is highlighted with a blue background). To the right of the "Store/Facility" dropdown is a red "Go" button. A mouse cursor is hovering over the "Peshawar Field Office" option in the dropdown menu.

PWD District User

12

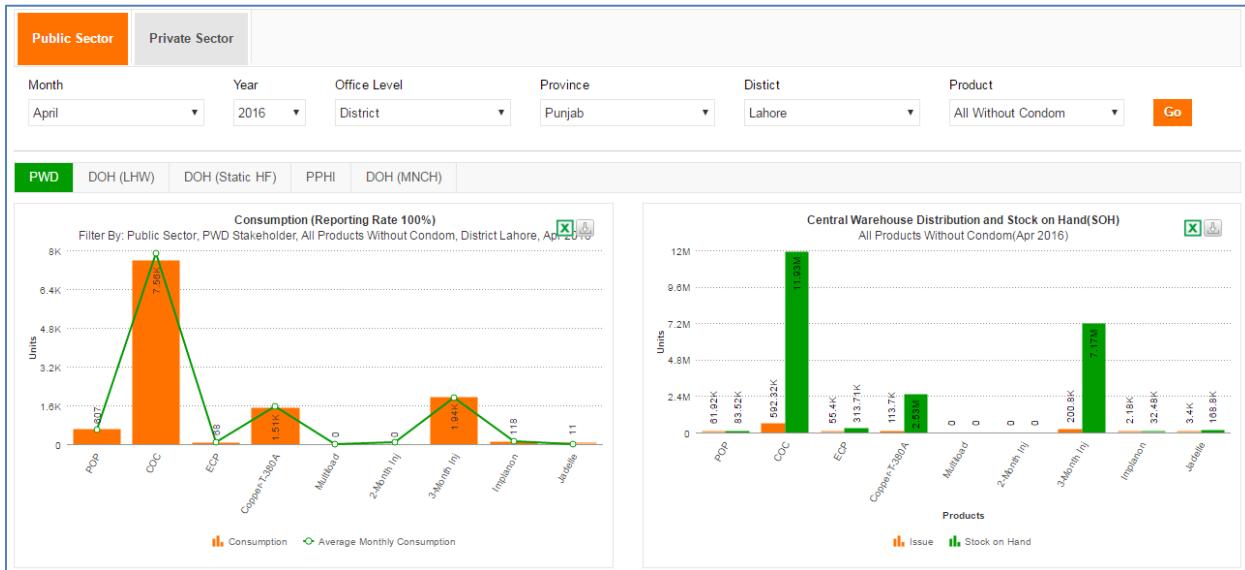

in Contraceptive Logistics Management Information System

This section explains the tasks that the authenticated users at PWD district level can perform while using Logistics Management Information System for contraceptives.

In order to log on to the system, the PWD user will be allocated a username and password. Once successfully logged in, the user will be directed to a ‘user information’ page specific to the organization. This page will contain specific information about the user’s department or organization.

In order to obtain LMIS data and reports, the PWD user must successfully login with his/her username and password. System users are defined by relevant stakeholders and the level in the supply chain they represent. After a successful login, the user will be directed to their stakeholder specific page. Based on the privileges assigned to the user by the system administrator, various menu items will appear on the interface homepage.

After a successful login, district users will see the following menu:

- **DPWO Lahore:** Name of the User who is currently logged in.
- **Sign Out:** Signs out the user to homepage of LMIS.

- **Change Password:** Allows user to change the password.

-  **Home**: By clicking this icon, user will reach the Dashboard page which appeared just after logging in.
- **Requisitions:** Users can add or view requisition requests.
- **Data Entry:** Users can enter monthly reports by using this menu item.
- **Monthly Reports:** Users can view warehouse / stores reports by using this menu item.
- **Reports:** Users can view pre-published analytical reports.
- **PBS Reports:** Users can view the PBS reports.
- **Provincial Reports:** Users can view the provincial level reports.
- **District Reports:** Users can view the district level reports
- **Maps:** Users can view analytical reports in the form of maps.
- **Graphs:** Users can view pre-published graphs.

Click **Home** to view the Dashboard.

Dashboard

The Dashboard is a visual display of the most important analysis to achieve one or more objectives; consolidated and arranged on a single screen so the information can be viewed at a glance.

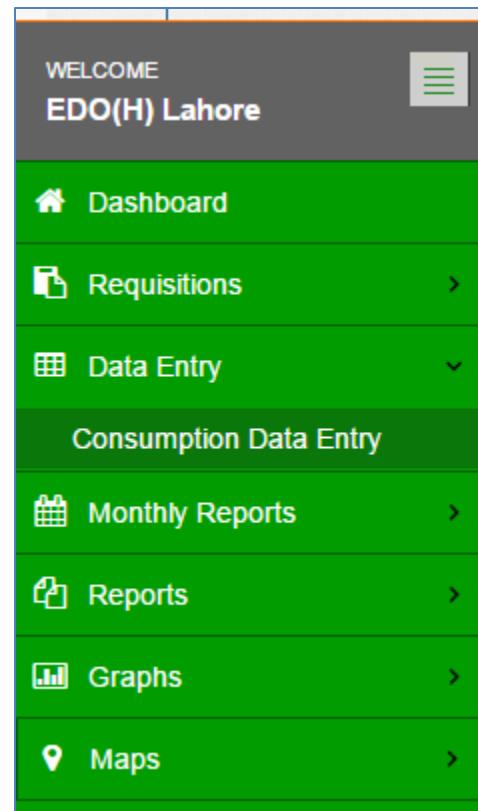

District user can view following dashboards by default:

- Public Sector Stakeholders
- Private Sector Stakeholders

Please refer to the Chapter 4 “**Dashboards**” above.

Data Entry (Monthly Stock Consumption)

In order to add monthly stock consumption report, click Data Entry tab from the main menu.

The facility data entry screen will be displayed. To enter consumption data for FHC/RHS-B, click the FHC or RHS-B name (**FWC Lady Wellington Hospital** as shown in the screenshot).

The screenshot shows the 'Consumption Data Entry' screen. The left sidebar has the following menu items:

- Dashboard
- Requisitions
- Data Entry
 - Consumption Data Entry
- Monthly Reports
- Reports
- Graphs
- Maps

The main content area displays two tables:

District/Field Stores

Sr. No.	Store Name
1	Lahore District Store

Health Facilities

Sr. No.	Health Facility Name	Sr. No.	Health Facility Name
1	FHC Lady Willingdon Hospital	2	FHC General Hospital
3	FHC Services Hospital	4	FHC Govt. Kot Khawaja Saeed Hospital
5	FHC Lady Aitchison Hospital	6	FHC Ganga Ram Hospital
7	FHC Jinnah Hospital	8	FWC Adda Chabeel
9	FWC Attari	10	FWC Avicina Hospital

A number of consumption report options from previous and current months will display.

Sr. No.	Health Facility Name
1	FWC Attack Cantt Last Update: 02/05/2016 08:41:02 AM Add May-16 Report + Apr-2016 ↗ Mar-2016 ↗

Click the **Add [Month] Report**. Once the user selects the Store/Facility and the month in which he/she wants to add data, a data entry screen will appear where the user can fill and save data for the reporting month.

FWC Attack Cantt (May 2016)

Enter the desired data within the form and click **Save**.

Save **Reset**

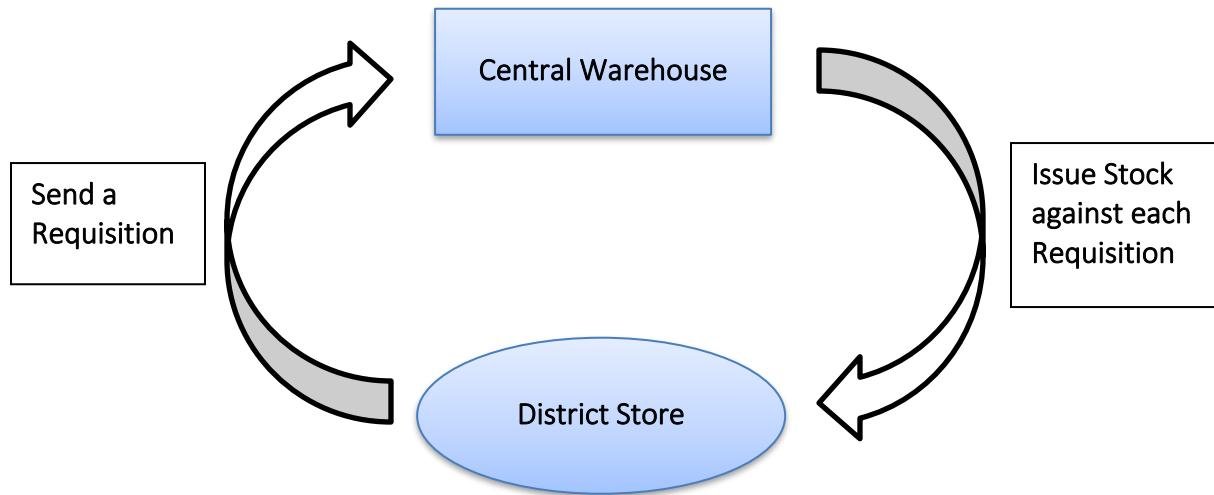

Users can also click **Reset** to either undo or make the changes.

Requisitions

The Stock Requisitions Form is used by DPWO to request commodities from CW&S. DPWO staff prepares this requisition form on a quarterly basis in consultation with the storekeeper of DPWO. This form indicates the stock status and consumption during the quarter and indicates the quantity request for each contraceptive in the respective districts.

The District Store users were required to fill out Requisition (CLR-6) based on the previous consumption of that district and submit them to the Central Warehouse. However, in Release-2 of cLMIS, Requisition (CLR-6) is auto generated using previous consumption trends for the required quantity of products for the next quarter.

New Requisition

The New Requisition (CLR-6) auto-fills the fields by using previous consumption data of a district in a selected quarter. This form was previously filled by the requester. PWD district users can create requisitions and electronically submit them to the central warehouse. These requisitions will be reviewed by the management of the central warehouse and stock will be issued as per stock availability and approved.

Provincial Reports

From the main menu, click the **Provincial Reports** tab. The application shows the list of all available reports at the provincial level. These reports include Provincial level Reports for all methods such as SPR-3, outlet and district-wise CYP performance and stock sufficiency report.

Click the **Provincial Reports** tab from the main menu to show a drop down list:

SPR - 3

The SPR - 3 is the Sales Performance Report based on the performance (the number of methods sold) at the provincial level. It shows the performance-based report for all methods in all health facilities in all districts of the selected province.

Central User

for the Contraceptive Logistics Management Information System

This chapter describes the tasks that the authenticated user at the Central level can perform while using Contraceptive Logistics Management Information System.

In order to log on to the system, the Central user will be allocated a username and password. Once successfully logged in, the user will be directed to a ‘user information’ page specific to the organization. This page will contain specific information about the user’s department or organization.

After a successful login, the user will be directed to stakeholder specific page. Based on the privileges assigned to the user by the system administrator (in this case, the user has privileges of a central user), various menu items will appear on the interface homepage. After successful login, Central user will see the following menu:

- **Central user:** Name of the User who is currently logged in.
- **Sign Out:** To sign out the user to homepage of cLMIS.
- **Change Password:** It allows user to change the password.
- **Requisitions:** Users can view, approve or decline requisition requests.
- **Inventory Management:** Users can manage the inventory of the district facilities / stores.

- **Gate Pass:** Users can create and view issued gate passes.
- **Monthly Reports:** Users can view their and other warehouse / stores reports.
- **Reports:** Users can view pre-published analytical reports.
- **Maps:** Users can view analytical reports in the form of maps.
- **Graphs:** Users can view pre-published graphs.

Dashboard

The Dashboard is a visual display of the most important analysis and can achieve multiple objectives. It is consolidated and arranged on a single screen so the information can be viewed at a glance.

The Central users can view following dashboards by default:

- Distribution and Stock on Hand (SOH)
- Expiry Status
- Product Summary
- Month of Stock

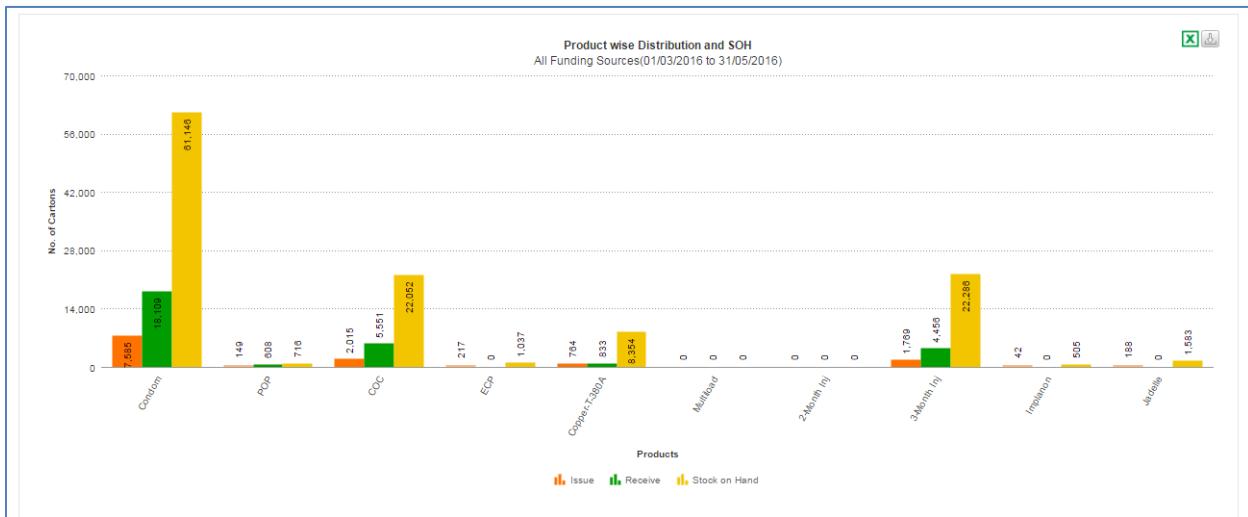

Distribution and Stock on Hand (SOH)

When a Central user logs in they will be able to view stock distribution and stock on hand (SOH) in a graphical manner. The bar graph will show the comparison between the issued stock and the stock on hand (SOH) for all products.

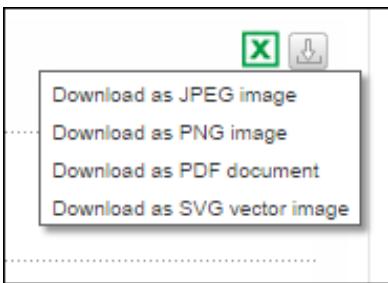

Select **Date From** and **Date To** and **Funding Source** from the available filters and click **GO**.

Date From	Date To	Funding Source	
02/03/2016	31/05/2016	All	Go

A bar graph for stock distribution and stock on hand for all products will be displayed.

Users can also export charts in CSV, JPEG, PNG, PDF and SVG format.

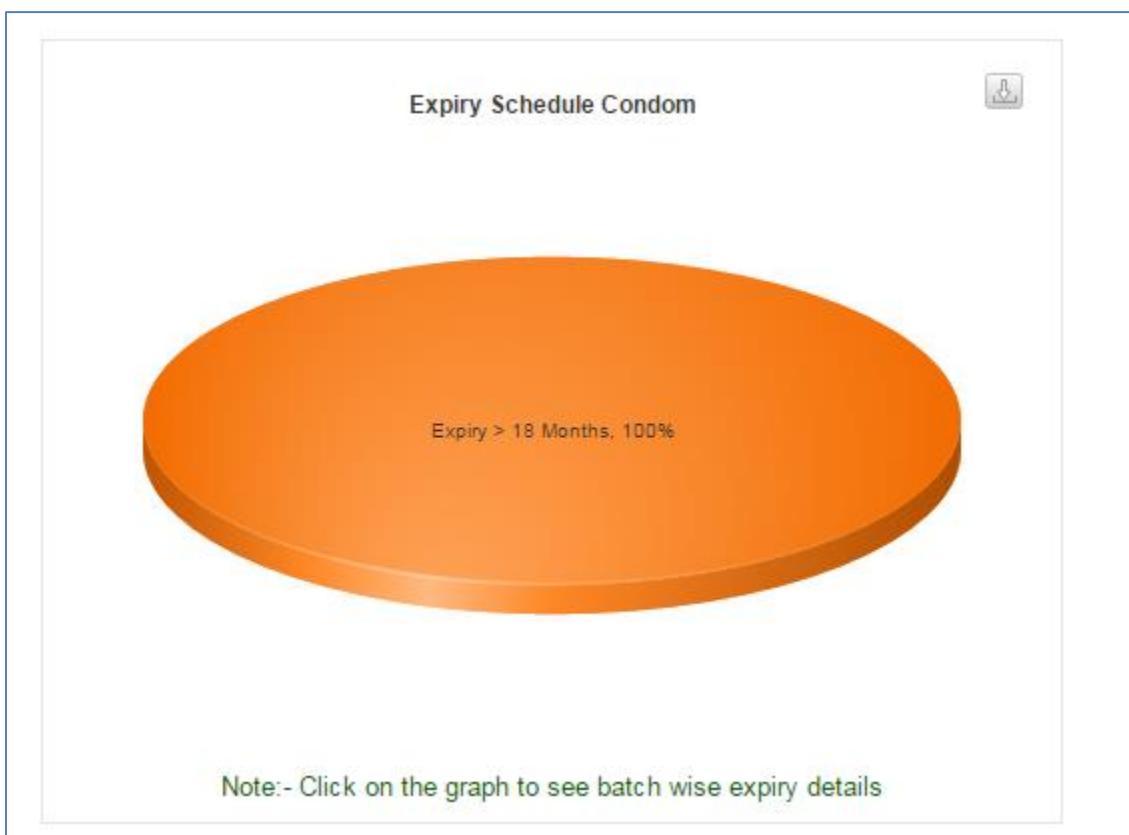

Expiry Status

Users can click the Expiry Status dashboard to view the expiry status of the available stock in the form of a pie-graph for public sector stakeholders.

Select a **Product** and **Funding Source** from the available filters and click **GO**.

Product	Funding Source	
Condom	All	Go

A pie-graph for stock expiry status for the selected product will be displayed.

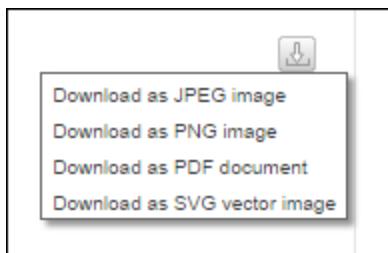

Click on the pie-graph distribution to view details for the expiry status of the available batches.

Users can also export charts in CSV, JPEG, PNG, PDF and SVG format.

Product Summary

Once users click the Product Summary Dashboard they will view the Stock Summary Report for public sector stakeholders.

Select **Date From** and **Date To** and **Funding Source** from the available filters and click **GO**.

Date From	Date To	Funding Source	
02/03/2016	31/05/2016	All	Go

A report for the summary of stock will be displayed which includes:

- Opening Quantity
- Received Quantity
- Issued Quantity
- Adjustments
- Closing Quantity

A Stock Summary Report will be generated for the selected time period. Users can also export charts in PDF and CSV format.

Stock Summary (01/03/2016 to 31/05/2016)								
Sr. No.	Product	Unit	Opening Quantity	Received Quantity	Issued Quantity	Adjustments		Closing Quantity
						(+)	(-)	
1	Condom	PCs	151,864,468	54,327,100	22,753,923	0	0	183,437,645

9	Implanon	PCs	34,976	0	2,688	0	0	32,288

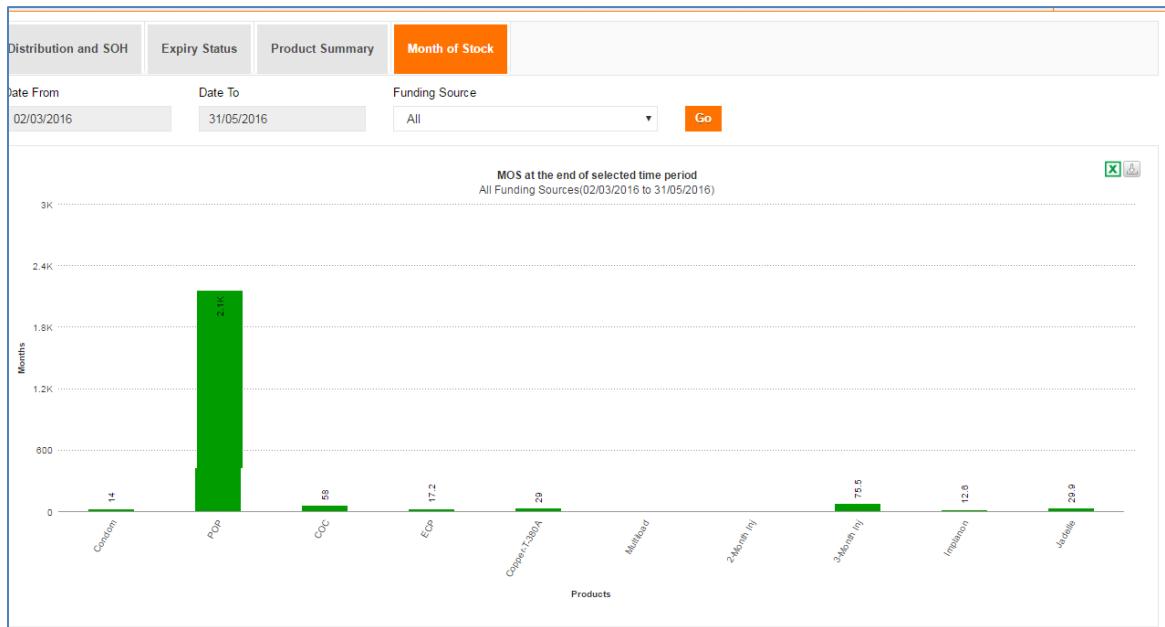

Month of Stock

Once users click the Month of Stock Dashboard, they will view the MOS for the selected period of time in the form of a bar graph.

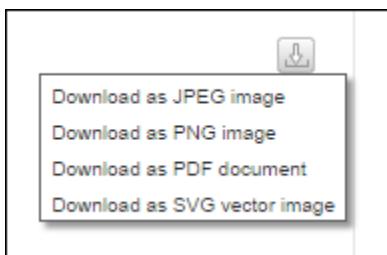

Select Date From, Date To and Funding Source from the available filters and click GO.

Date From	Date To	Funding Source	Go
02/03/2016	31/05/2016	All	

A bar graph for month of stock for all products will be displayed.

Users can also export charts in CSV, JPEG, PNG, PDF and SVG format.

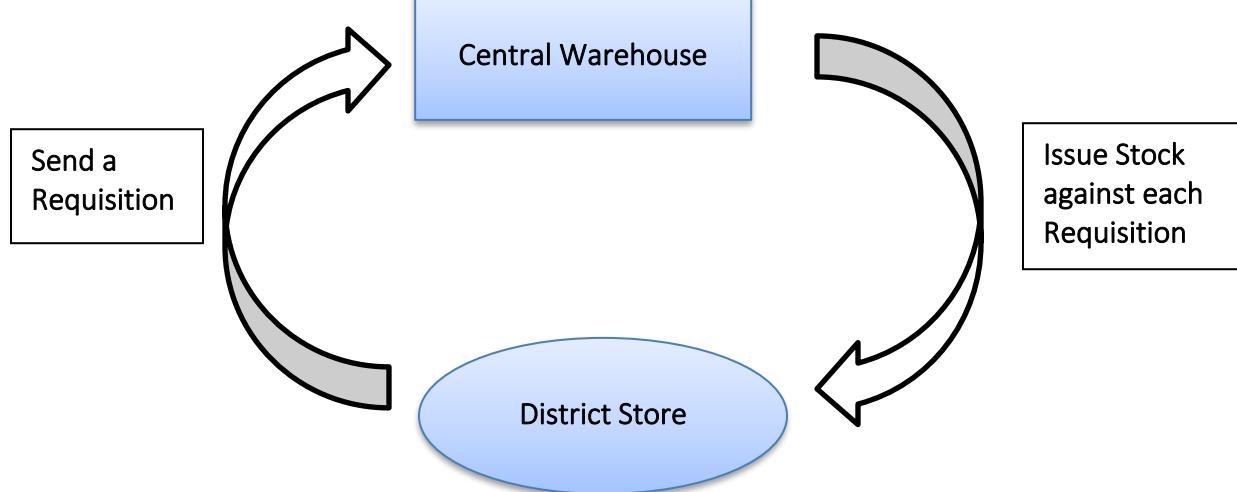

Requisitions

The Requisition form is used by district staff to request commodities from CW&S. District staff prepares this requisition form on quarterly basis in consultation with the storekeepers. This form indicates the stock status and consumption during the quarter and indicates the quantity requested for each contraceptive being used in each respective districts.

The Central warehouse can manage requisition requests placed by the district stores or facilities. The user at the central warehouse can approve these requisition requests.

Requisition Requests (CLR-6)

The district store places a Requisition Request (New CLR-6) based on the previous consumption of that district and submits it to the Central Warehouse. This Requisition Request (CLR-6) is auto generated using previous consumption trends for the required quantity of products for the next quarter.

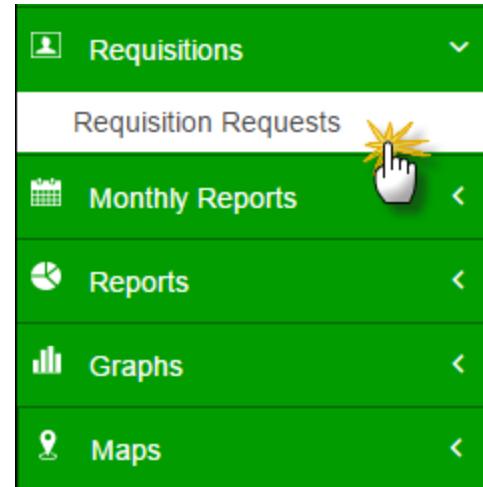

District users can create requisition requests and electronically submit them to the Central Warehouse. These requisitions will be reviewed by the management of the Central Warehouse and stock will be issued as per stock availability and approval.

Central and provincial stores are able to manage requisition requests by district stores. The cLMIS system will provide options to view detailed Requisitions (CLR-6), and stock issue vouchers against any requisition and approve.

Click **Requisition Requests** under the Requisition tab.

To find a requisition request placed by district users, specify the following:

- **Province:** select a province.
- **District:** select a district.
- **Stakeholder:** select the required stakeholder
- **Issue Ref.:** To search using the Issue Ref, select this option and then specify the Issue Ref in the adjacent text box.
- **Batch No.:** To search using the Batch No., select this option and then specify the Batch No. in the adjacent text box.

Inventory Management

Inventory Management is a component of supply chain management and supervises the flow of goods from suppliers to warehouses and from these facilities to the districts and ultimately to the point of sale. One of the key functions of inventory management is to keep a detailed records of each new or returned product as it enters or leaves a warehouse or the point of sale.

Inventory Management features enable the Store Users to manage the inventory for the Central Warehouse. Store Users can perform the following tasks:

- **Stock Receive from Supplier:** Central user can receive stock directly from suppliers.
- **Stock Receive from Warehouse:** Central user can also receive stock from other warehouses.
- **Stock Receive Search:** Central user can search the received stock from other warehouses or suppliers.
- **Stock Issue:** The stock is issued to other warehouses and stores on demand.
- **Stock Issue Search:** Central user can search the stock issued to other warehouses.

- **Batch Management:** When stock is received, the user marks the batches with the latest expiry date as ‘Running’, so that this stock can be issued first.
- **Stock Adjustments:** If stock is lost or recovered, users can add adjustments in the CLMIS.
- **Search Adjustments:** User can search the added adjustments for a selected duration.
- **Manage Locations:** User can also manage the location of stock within the warehouse.
- **Location Status:** User can check the stock available at a particular location in the warehouse and transfer it to another location.
- **Stock Pick:** User can select the Issue No. to pick a particular product from the voucher list.
- **Bin Card:** User can view the products related to the searched bin card.

Stock Receive (Supplier)

User at the Central level can receive stock directly from the supplier. Users can also add information such as Funding Source, Product, Manufacturer, Batch No, Expiry Date and Quantity of the required product.

Specify the following information:

- **Receipt No:** is an automatically generated number for identifying the receive transaction.
- **Ref No:** specify the receive reference.
- **Received Date:** Click on Receive date to expand the date picker tool and select the date.
- **Receive From:** Select the supplier for the product.
- **Product:** select the product from the list.
- **Manufacturer:** select or add the manufacturer for the selected product.
- **Batch No:** specify the batch number for the product.
- **Expiry Date:** Click on Expiry date to expand the date picker tool, or type-in the required date using format dd/mm/yyyy.
- **Quantity:** Add the received quantity for the selected product.

Click **Save Entry** to add the entry in the Receive List. The entry moves to the Receive List. Add new entries, as required. All of the entries will be displayed in the Receive List.

Stock Receive (Warehouse)

The Central warehouse user can receive the stock being issued by other warehouses such as at the provincial or district levels. Storekeepers will be able to receive products against the issue voucher number provided by the issuing authority.

Add **Issue Number** to search for the required entry in the database. The required issued entry will be displayed.

Review the issued product's details. The table includes:

- **Product:** displays the product name.
- **Batch:** displays the batch number for the product.
- **Quantity:** displays the issued quantity.
- **Adjusted Quantity:** if the received quantity is different than the issued quantity, you can enter the adjusted quantity in this text box.
- **Adjustment:** specify the adjustment type.
- **Receive Reference:** specify the receive reference.
- **Receive Date:** click on the Receive Date to expand the date picker tool and specify the received date.
- Check the icon in the end of the row and then click **Save & Print**.

The screenshot shows a 'Stock Receive' form. At the top, there's a 'From Warehouse' section with an 'Issue No' input field containing 'I000051' and a red-bordered 'Search' button. Below this is a table with columns: Product, Batch, Quantity, Adjusted Qty, and Adjustment. A row is shown for 'Condom' with 'GM1' in the Batch column, '1000' in the Quantity column, and '500' in the Adjusted Qty column. The Adjustment dropdown menu is open, showing options: Theft (selected), Theft, Lost, and Damaged. At the bottom of the form are fields for Remarks, Receive Reference, and Receive Date (set to 11/08/2014). On the right side, there's a red-bordered 'Save' button with a cursor pointing at it.

Stock Receive Search

User can search received stock by Receive No, Receive Ref or Batch No. User can also select the Warehouse Supplier and product to search a particular stock.

To search for a receive entry, specify the following filters:

- **Search By:** the unique identifier you want to search by. The options include:
 - **Receive No:** if you know the receive number, select this option and specify the receive No. in the adjacent text box.

- **Receive Ref:** to search using the Receive Ref, select this option and then specify the Receive Ref in the adjacent text box.
- **Batch No.:** to search using the Batch No., select this option and then specify the Batch No in the adjacent text box.
- **Warehouse Supplier:** select the warehouse supplier. This is an optional field.
- **Product:** select the required product from the list.
- **Date From, Date To:** click on date to expand the date picker tool and select dates.

Click **Search**.

The required entries are displayed in the Receive Search list.

Stock Issue

Central user can issue stock using this option. At National level, the stock issue is based on the districts requisition (CLR-6). Provincial and district storekeepers can also issue the stock back to the respective upper level store if required.

To issue stock, specify the following filters:

- **Date:** Click on date to expand the date picker tool and add a date.
- **Stakeholder:** Select stakeholder from the list.
- **Office:** Select the office from the drop down list.
- **Store:** Select the store from the list.
- **Product:** Select the product from the list.
- **Batch No:** Select batch no. for the selected product.
- **Quantity:** Add quantity from the quantity of the product available.

Click **Add Issue**.

New Issue

Save **Print**

Stock Issue Search

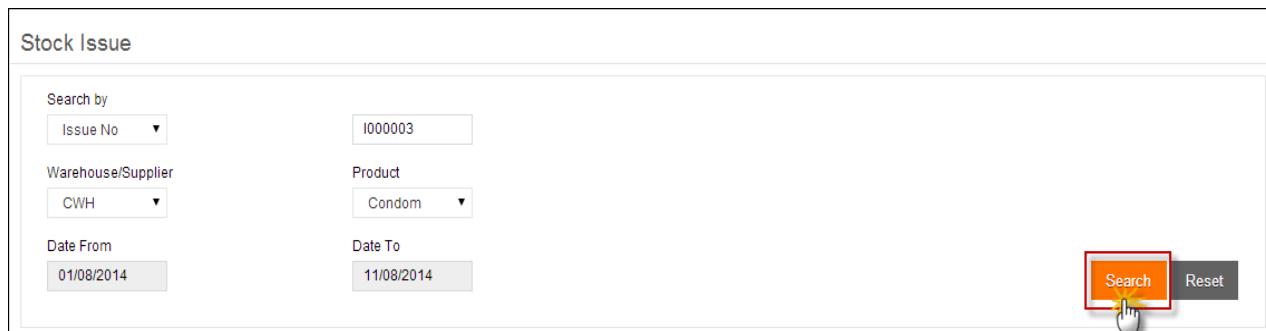

Central user can also search the issued stock by Issue No, Issue Ref, or Batch No. User can also select the Warehouse Supplier and the Product to search a particular stock. The system provides an option to print a filtered search as well as an individual transaction. User can also print stock issue summaries as well as detailed lists of stock being issued based on product and location.

To search for an issued entry, specify the following filters:

- **Search By:** Specify the unique identifier you want to search by. The options include:
 - **Issue No:** if you know the issue number, select this option and specify the issue No. in the adjacent text box.
 - **Issue Ref:** to search using the Issue Ref, select this option and then specify the Issue Ref in the adjacent text box.
 - **Batch No.:** to search using the Batch No., select this option and then specify the Batch No in the adjacent text box.
- **Warehouse / Supplier:** select the warehouse / supplier. This is optional field.
- **Product:** select the required product from the list.
- **Date From, Date To:** Click on date to expand the date picker tool.

Click **Search**.

The specified issued stock will appear in the Issue Search list.

The screenshot shows a search results page titled "Issue Search". At the top, there are icons for Excel and PDF, and a dropdown for "records per page" set to 10. A search bar is present. Below the header is a table with the following columns: Date, Issue No., Issue To., Ref No., Product, Batch No., Quantity, Unit, and Expiry Date. One row is displayed: 09/08/14, I000003, CWH, (empty), Condom, B24072014, 100 PCs, and 31/07/14. At the bottom, it says "Showing 1 to 1 of 1 entries" and has navigation buttons for "Previous" (disabled), "1", and "Next". Below the table are summary and detail links, and "Print" buttons.

Batch Management

Once the stock is received at a warehouse, each package is identified by its Batch Number and Expiry Date. Each batch is sorted by its expiry date by the rule of "First Expiry First Out". When batches of stock are added to the cLMIS, the account user usually assigns the batches with latest (nearest expiry) expiry date as 'Running'. The running batches are issued first. The cLMIS provides a section for batch management of each product. Each batch will have a status i.e. Running, Stacked, and Finished. Central users will be able to change the status of batches as desired.

Stock can be issued only if their batch status is set to Running by the system. One or more batches can be set to running depending on the quantity and expiry date of the product.

The system provides a summary of batches of each product with a total quantity.

The screenshot shows a "Batch Management" interface. At the top, it says "Batch Management". Below that is a "Product" dropdown set to "Condom" and a large orange "Summary" button with a hand cursor icon pointing at it. The background is white with some light gray shading.

Batch Management summary for the stock will be displayed.

Condom		
Batch Status	No of Batches	Quantity (PCs)
Running	1	432,000
Stacked	432	183,100,568
Finished	2322	0
Total	2755	183,532,568

In order to mark the status of the batch, user can specify search criteria to search for the required batch as follows:

- **Product:** select the required product from the list.
- **Status:** specify the status of the batch that you are searching for.
 - **Running:** Only the batches with the status “Running” can be issued.
 - **Stacked:** Stacked batches represent that they are stacked in the warehouse and cannot be issued.
 - **Finished:** batches that have finished.
 - **Total:** total number of running and stacked batches.
- **Batch No:** Optional, specify the Batch No of the required batch.
- **Ref. No:** Optional, specify the Ref. No. of the required batch.

Click **Search**.

The screenshot shows a search interface with the following fields:

- Product:** A dropdown menu showing "Condom".
- Status:** A section with four radio buttons:
 - Running
 - Stacked
 - Finished
 - Total (Running + Stacked)** (selected)
- Batch No:** An empty input field.
- Ref No:** An empty input field.
- Funding Source:** A dropdown menu showing "All".
- Search:** An orange button.

The Search results are displayed in a table.

Print

Click the button to make the Batch either Running or Stacked.

Click the button to display Placement Info

User can review the batch status and change it by clicking the button adjacent to it.

Remember that in order to issue batches, you have to first set the status to 'Running'.

Click Print.

The Batch Management form is saved and printed.

New Adjustments

Occasionally, users want to update the number of items in stock manually. In case of lost and damaged items or if less inventory has arrived than expected, users can add stock adjustments for managing inventory.

Central users can add adjustments as needed for occasions such as of stock theft, lost, recovered, expired, or damaged stock.

To add new Adjustments, specify the following criteria:

- **Adjustment Date:** click to expand the date picker tool and select the date.
- **Ref. No.:** optional, specify the Ref. No. of the batch.
- **Product:** select the product from the list.
- **Batch No:** specify the Batch No of the batch.
- **Adjustment Type:** specify the adjustment type.
- **Quantity:** specify the quantity of the product.
- **Comment:** add comments, if any.

Click Save.

Specify Adjustment Details.

Adjustment Date *	Adjustment Type *	Ref. No.
<input type="text" value="01/06/2016"/>	<input type="text" value="Return"/>	<input type="text"/>

Save Reset		

Search Adjustments

Central user can also search adjustments to stock by adjustment type and product. The system provides an option to print filtered search and individual transaction.

To search for Adjustments, specify the search criteria:

- **Adjustment No.:** is an automatically generated unique identifier for the adjustment.
- **Adjustment Type:** specify the adjustment type.
- **Product:** select the product from the list.
- **Date From, Date To:** click on date to expand the date picker tool and select the dates.

Click **Search**.

Placement Locations

Central user can manage placement locations for the stock within the main warehouse by adding location Area, Row, Rack, Rack Type, Pallet as well as Level.

To manage locations for the stock within the warehouse, select the following filters:

- **Area:** select the location.
- **Row:** select the row for the stock.
- **Rack:** select the rack for the stock.
- **Rack Type:** select the rack type as Single or Double.
- **Pallet:** select the pallet for the location.
- **Level:** select the level for the location.

Click Save Entry.

If stock is placed on location, it can not be deleted
If stock is placed on location, its status can be changed only after moving the stock to another location

Stock Pick

Central user also has an option to issue stock to other warehouses, provincial stores / facilities as well as field offices. Once a central user issues stock to a district, it is placed at a location within the warehouse. User can manage the placement location of the stock from the **Location Status** (see the next section).

Remember that in order to issue and pick batches, you have to first set the status to 'Running'.

Select Date From and Date to and click search issued vouchers will be listed in the issue voucher list drop down from where select the **Issue No.** to pick a stock of any particular product.

Gate Pass

Once a stock has been picked to be transferred to another location, a new gate pass will be created. To create a new gate pass, select the Issue No. of the products to be picked along-with the vehicle and vehicle type. User must also add the quantity to be picked from the issued quantity of the product.

Select **Gate Pass** from the main menu to issue a new gate pass or view a list of gate passes.

New Gate Pass

Click **New Gate Pass** under the Gate Pass tab.

To issue a new gate pass, user specify the following:

- **Date From, Date To:** click on the Date to expand the date picker tool and select dates.
- **Vehicle Type:** select a vehicle type.
- **Vehicle:** select a vehicle from the list or check other.
- **Issue No.:** select one or multiple issue numbers from the shown list.
- **Date:** click on date to expand the date picker tool and select date for the issuance of gate pass.

The issued products will be displayed in the list. Add the quantity to create gate pass from the issued quantity and click **Save**.

A screenshot of the 'New Gatepass' creation interface. The interface includes fields for Date From (01/06/2014), Date To (31/08/2014), Search button, Vehicle Type (Contract), Vehicle (x-68-2477), Issue No. (dropdown list showing 1000052, 1000051, 1000053, 1000050, 1000049, with 1000050 selected), Date (11/08/2014), and a 'Select the filters to create a new gate pass.' callout bubble. Below these are tables for Product (Condom, POP) and Batch No. (GM1, GM2) with their respective Issued Quantity (12999, 1163), Quantity (1000, 1000), and Remaining Quantity (11999, 163). A red box highlights the 'Save' button at the bottom right.

Product	Batch No.	Issued Quantity	Quantity	Remaining Quantity
Condom	GM1	12999	1000	11999
POP	GM2	1163	1000	163

View Gate Pass

Click View Gate Pass under the Gate Pass tab.

To view the list of issued gate passes, user specify the following:

- **Date From, Date To:** Click on date to expand the date picker tool and select dates.
- **Vehicle Type:** select a vehicle type.
- **Vehicle:** select a vehicle from the list or check other.

Click Go. The list of gate passes will be displayed.

Electronic Client Record (ECR)

ECR is a web-based application, the module covers indicators of Family Planning, General Health Services and LARC Removal. It consists of internally configurable options, using built-in CMS. The services data is automatically aggregated in cLMIS reports and analytics.

ECR Landing Page

This page presents a summarized view of the overall information of facility based on facility status, number of visits at specific facility, total number of clients and the corresponding total number of visits.

A screenshot of the ECR landing page. The header includes the national flag, 'LMIS Statistics', and a 'Feedback' link. The main content area is titled 'ELECTRONIC CLIENT RECORDS' and features a message to download the Android app. On the right, there are two large red numbers: '128 REGISTRATIONS AT YOUR FACILITY' and '145 TOTAL VISITS AT YOUR FACILITY'. Below these are two smaller boxes: '4067 TOTAL CLIENTS IN PWD SINDH ECR' and '975 TOTAL VISITS IN PWD SINDH ECR'. The left sidebar mirrors the navigation menu from the previous screenshot, listing various ECR-related functions.

Search Client

Through Search Client menu, user can search the client using any keyword via patient name, father name, CNIC, CRC number etc. to filter the matching records. On search results all client details and corresponding visit details are displayed. The system also allows the user to edit an existing visit or client information or add a new visit for registered clients in search client.

Add Client

For new client registration click Add Client displayed under Electronic Client Record menu.
 Following are the required client details for new client registration:

- **Serial Number/Registration Number:** A system generated number to uniquely identify a register patient
- **Identification of Client :** Nationality of the patient
- **CNIC Number of Client:** National identity card number of the client
- **Date of Registration:** Date on which the client is registered
- **CRC Old/New:** Specify if the client is already registered against the CRC number
- **CRC Number:** The Client Registration Number
- **Clients Name:** Full Name of the client
- **Husband/Father Name:** Full name of Guardian
- **Complete Address:** Detailed address of the client
- **Catchment Area:** Specify if client is from rural, urban or slum area
- **Contact Number:** Contact details of the client

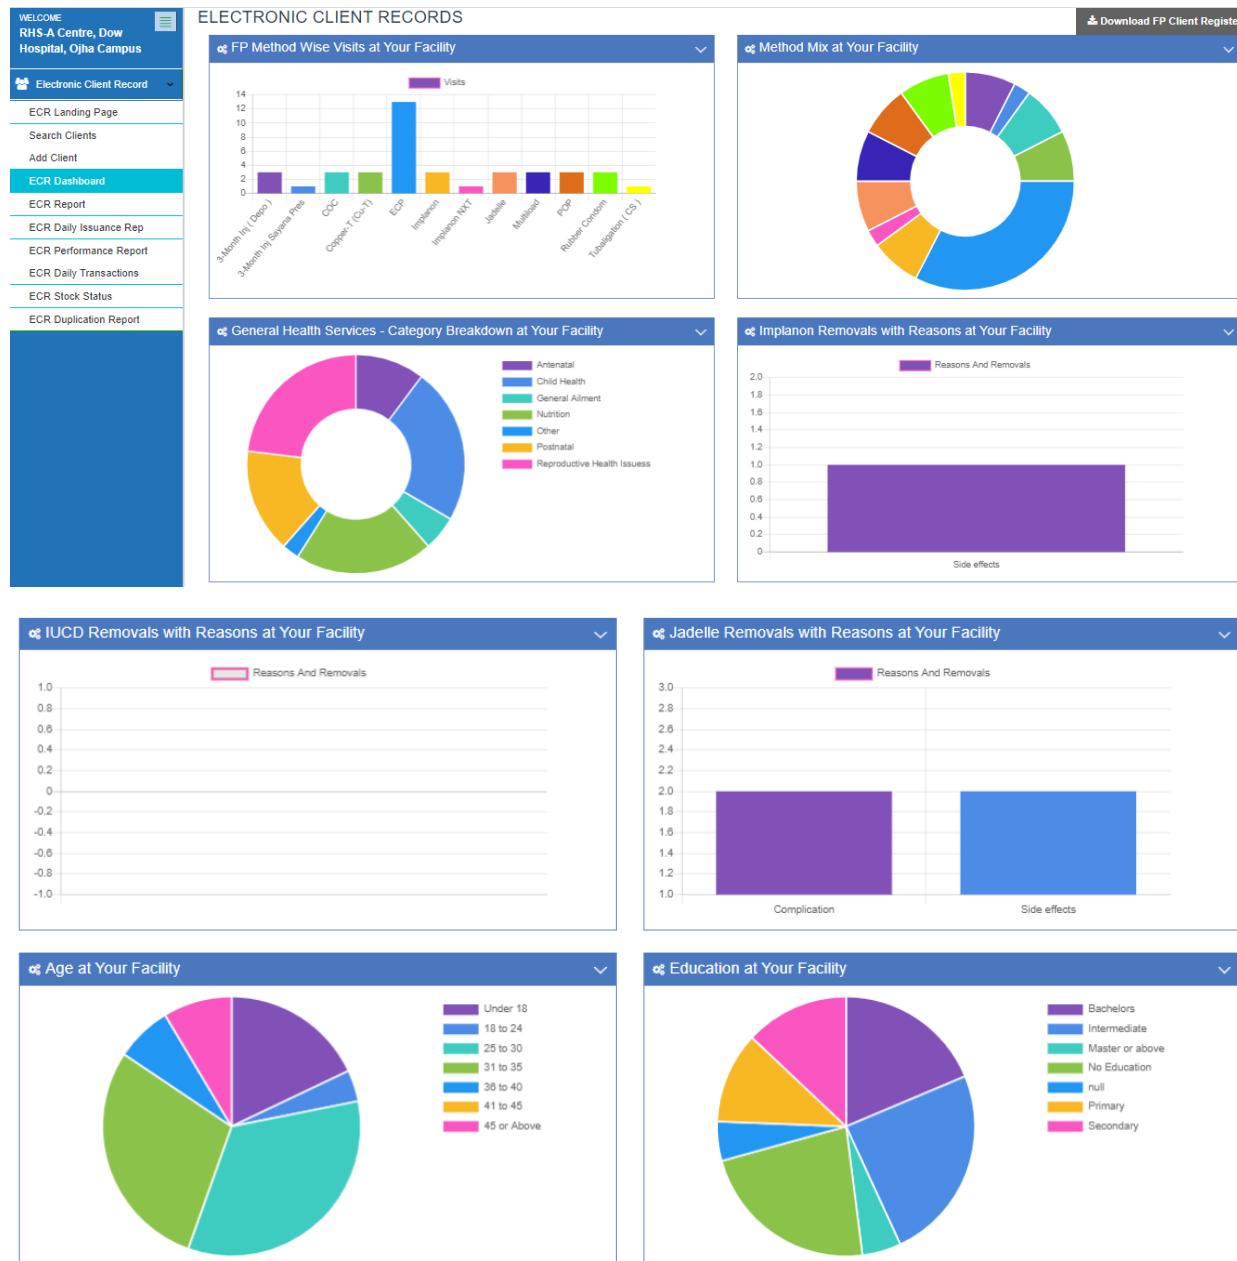

The screenshot shows the 'Electronic Client Records' (ECR) registration interface. The left sidebar has a navigation menu with options like 'Electronic Client Record', 'ECR Landing Page', 'Search Clients', 'Add Client', 'ECR Dashboard', 'ECR Report', 'ECR Daily Issuance Rep', 'ECR Performance Report', 'ECR Daily Transactions', 'ECR Stock Status', and 'ECR Duplication Report'. The main form is titled 'Register Client' and contains fields for 'Serial Number / Registration Number' (100018-202301-4069), 'Identity of client' (Pakistani), 'Date of Registration' (01/13/2023), 'Clients Name' (Full Name of Client), 'CATCHMENT AREA' (Urban selected), 'Education of Client' (No Education (NE)), 'CRC Old / New' (New selected), 'Husband/Father Name' (Name of Father or Husband), 'Contact Number (client / husband / father)' (03xxxxxxxx (11 digits)), 'Age(Years)' (Age as of Today in Years), 'CNIC Number (client / husband / father)' (00000-0000000-0 OR 0000000000000000), 'CRC Number' (CRC Number Mentioned on Register), 'Complete Address (with landmark)', 'Occupation of Client / Head of household' (Labor (L)), and 'Years of Marriage'. At the bottom, there are 'Save & Continue' and 'Cancel' buttons.

ECR Dashboard

It visually represents overall analytics of data in the form of following dashboards:

- FP method wise visits at your facility
- Method mix at your facility
- General health services
- Implanon removals with reasons at your facility
- IUCD removals with reasons at your facility
- Jadelle removals with reasons at your facility
- Age at your facility

- Education at your facility
- Occupation at your facility
- Demographic characteristics at your facility
- Parity alive at your facility

ECR Indicator Based Report

The ECR Indicator based Report reflects data based on the indicator selected.

The left screenshot shows the 'Indicator Report' page with a dropdown menu open, displaying various indicator options such as FP, OHS, LARC, and Removal. The right screenshot shows the same report page with the dropdown closed, showing a table titled 'Visits Breakdown of Your Facility' with three rows of data: FP (28), OHS (22), and LARC/REMOVAL (21).

ECR Daily Issuance Report

The report shows the issuance details of the product issued by the centres within the selected date range. Based on date of visit and item selected user can further drill down the data and can see the visits record.

The screenshot shows the 'Drill Down - Summarized Issuance Report' page. It includes fields for 'From' (01/01/2023) and 'To' (01/13/2023). A dropdown menu for 'Item' is open, showing a list of items including ALL, Rubber Condom, COC, FIP, ECP, 3-Month Inj (Depo), 3-Month Inj Sayana Press, Copper-T (Cu-T), Multiload, Jadelle, Tubal ligation (CS for Female), and Vasectomy (CS for Male). The page also features a search bar and a 'Download FP Client Register' button.
